

CASUS
5A

Klinische gegevens

♀ 73

Voorgeschiedenis

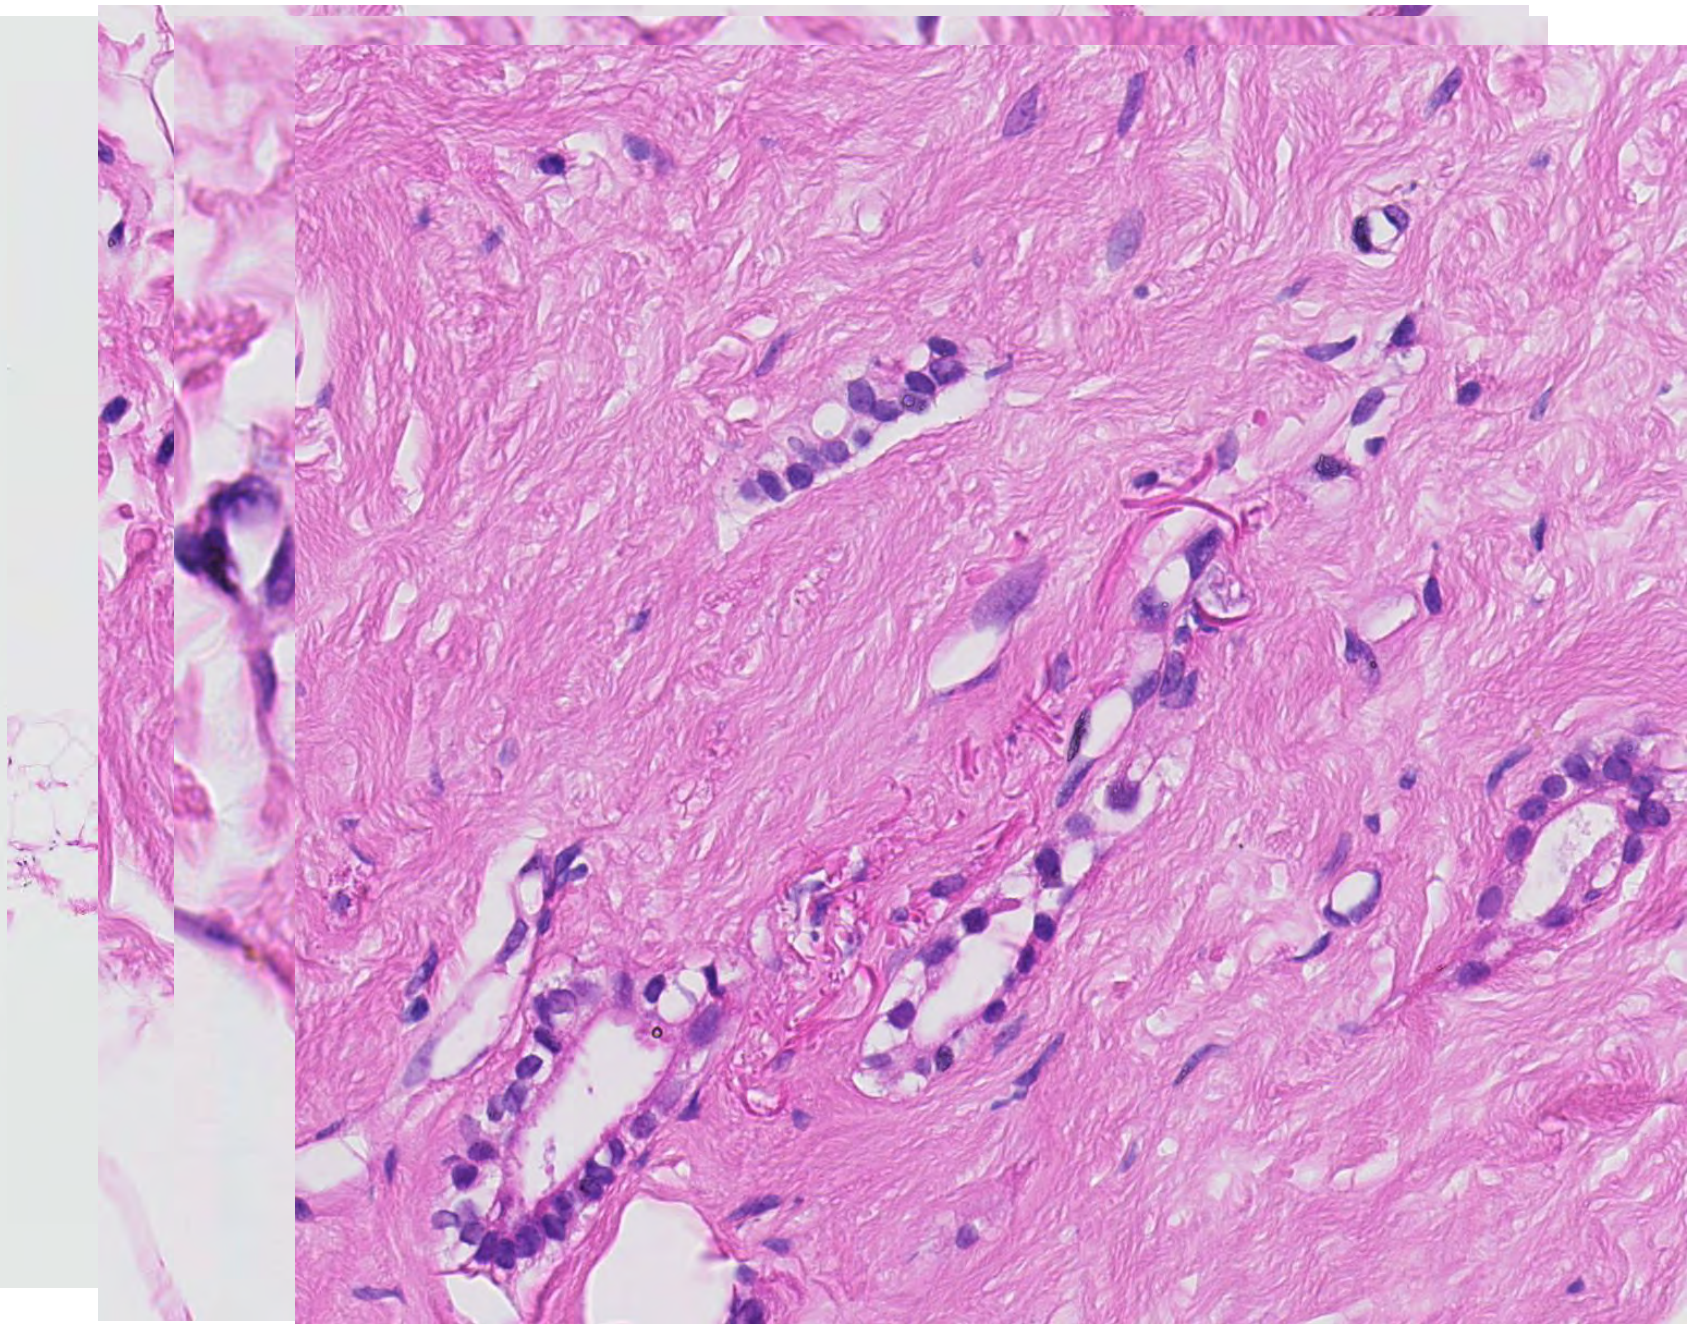

meerdere basaalcelcarcinomen over het gehele lichaam

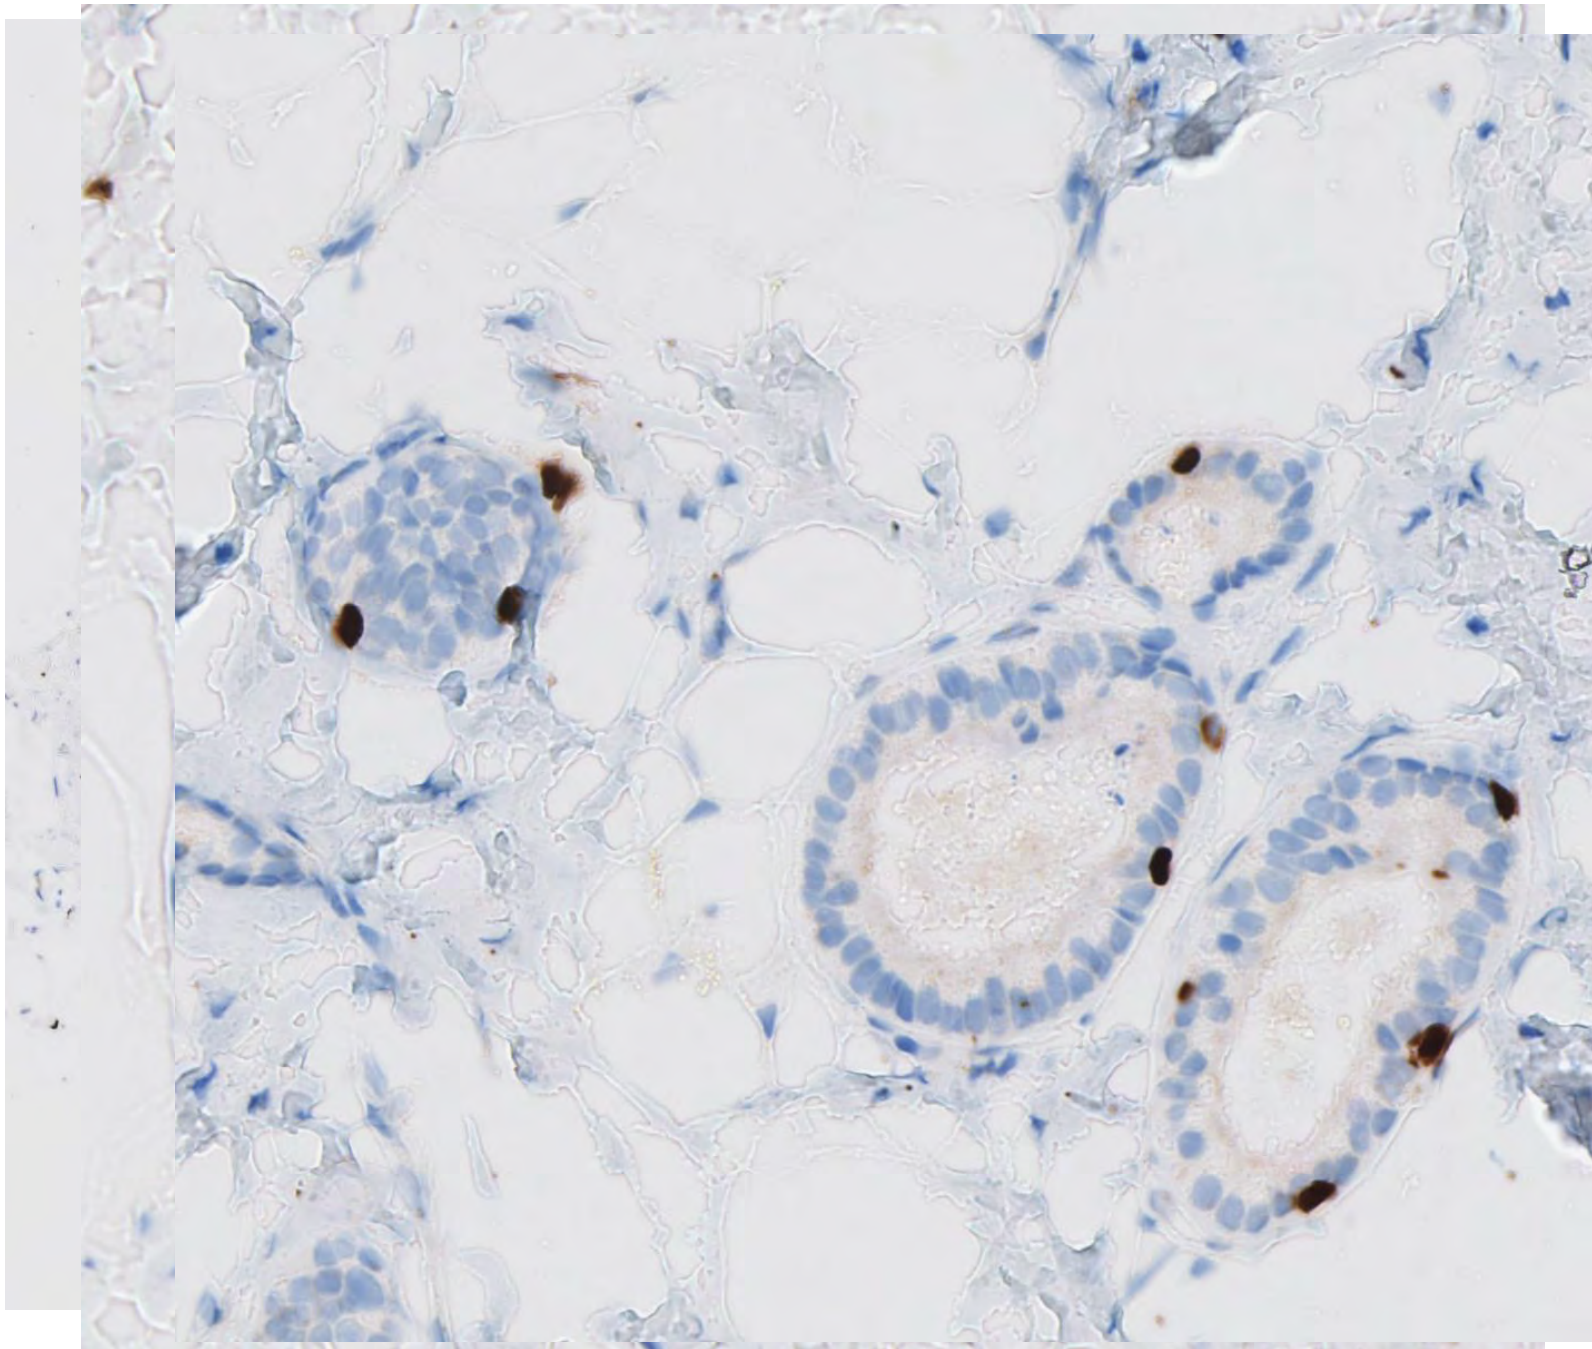

Aard materiaal

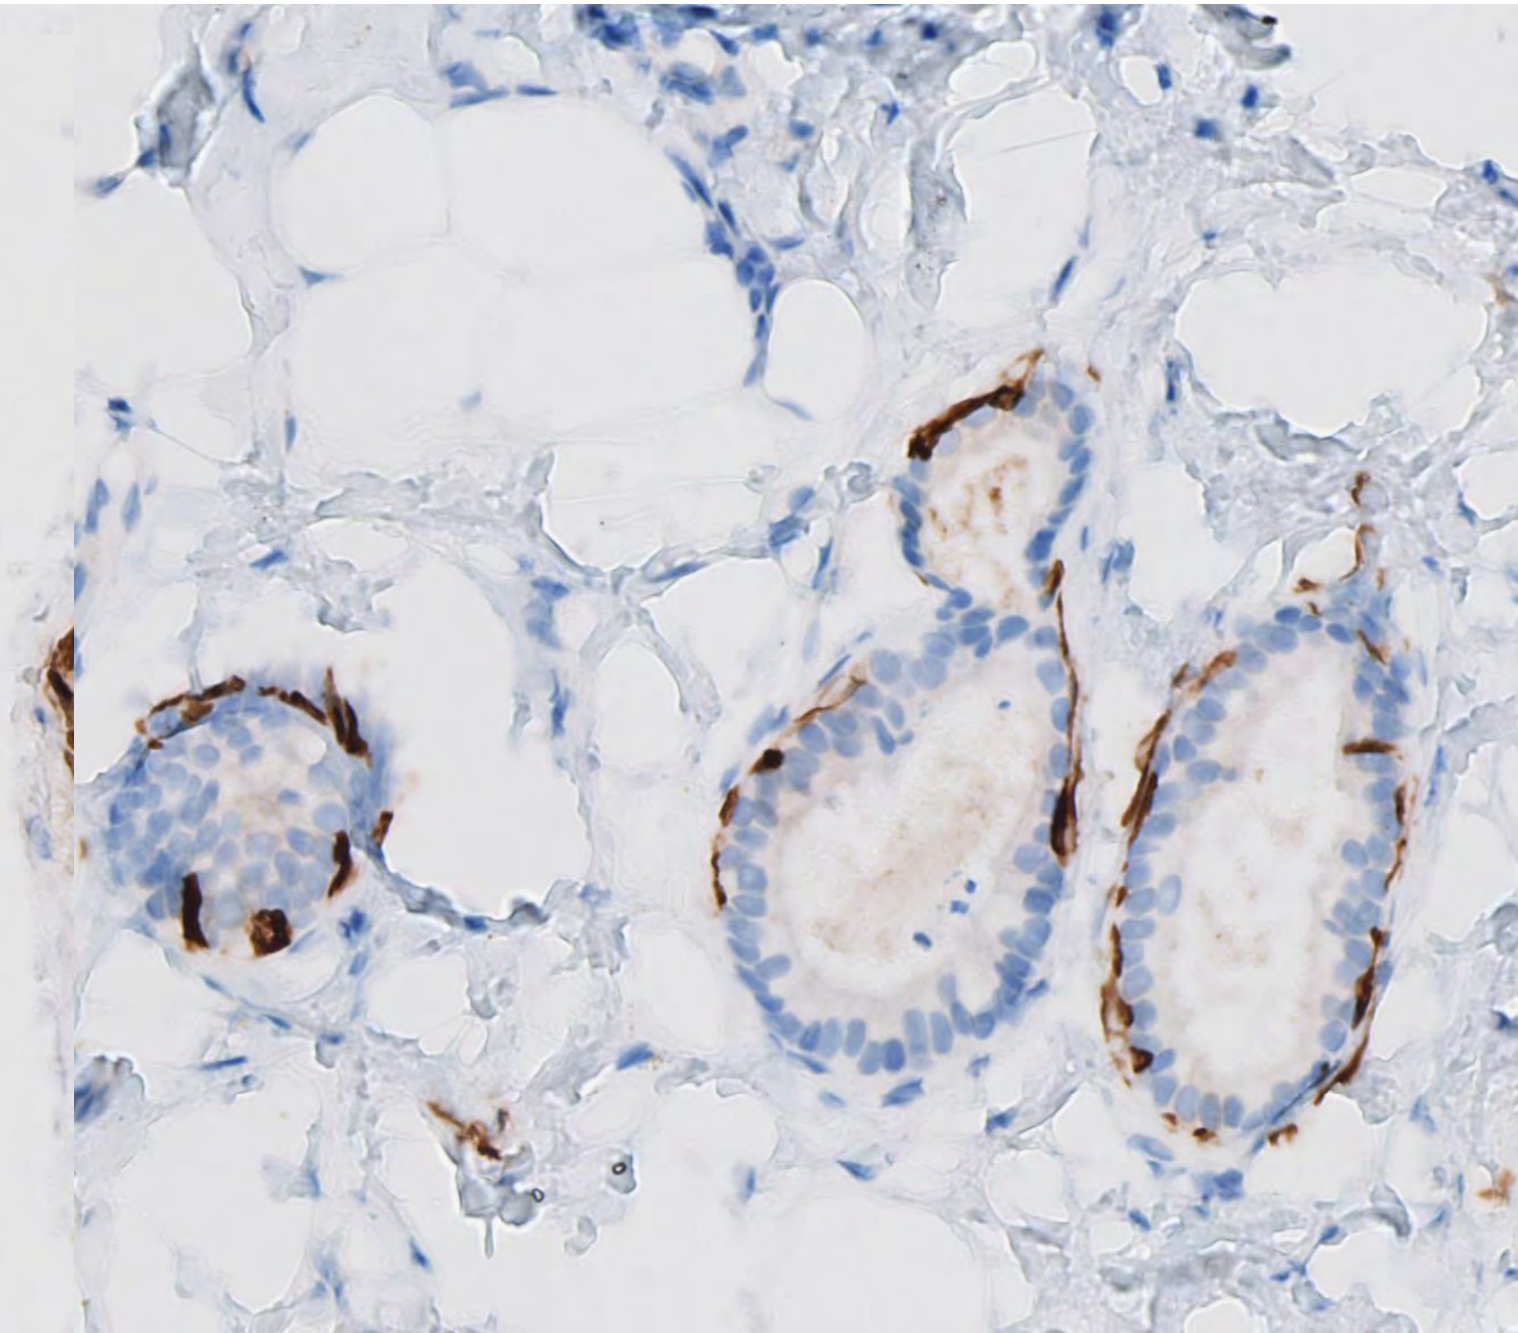

biopten mamma links

Kliniek

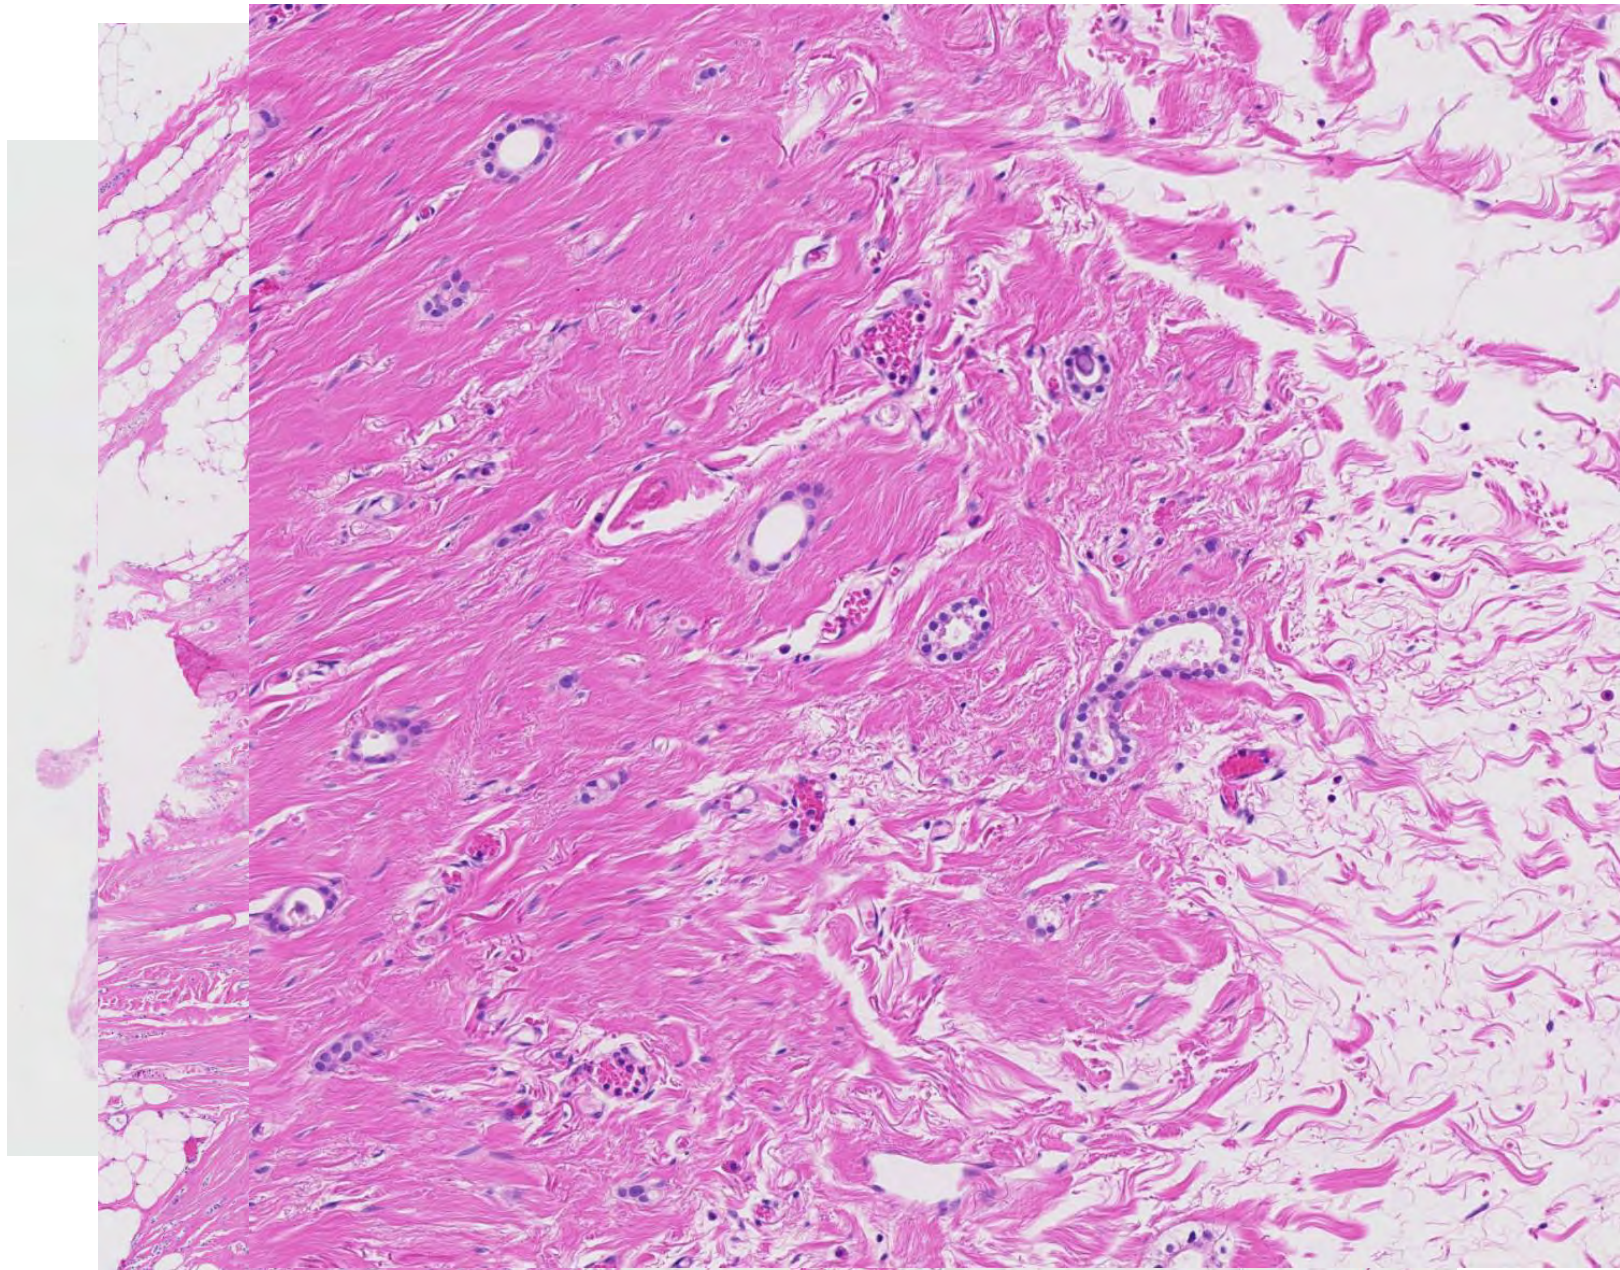

matig afgrensbare massa mediocentraal op X-MG, gespiculeerd

nine

w-up

CASUS 5A:

Tubulair carcinoom

CASUS
5B

Klinische gegevens

♀ **65**

Voorgeschiedenis

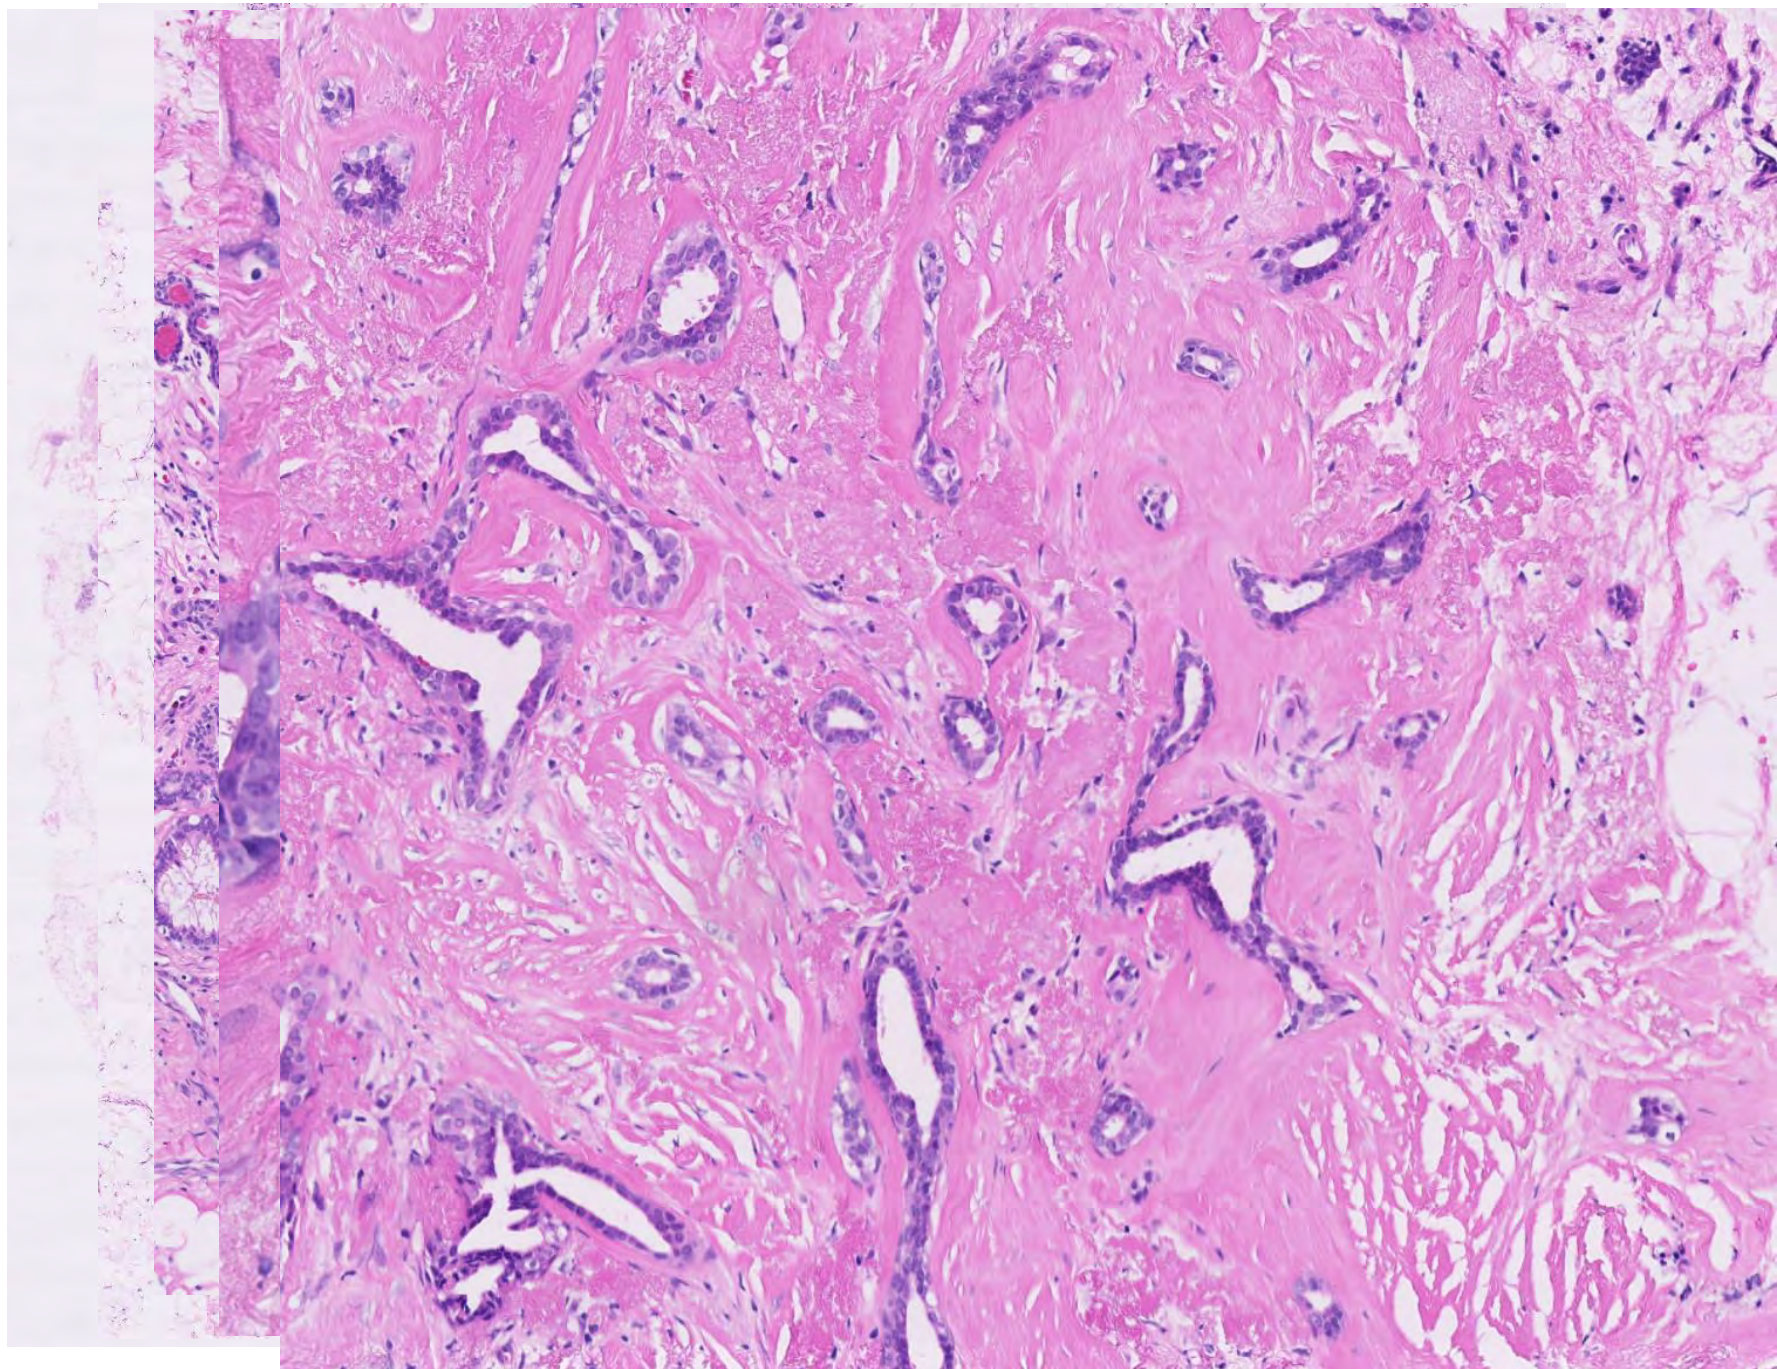

intraductaal papilloom rechts (1995).

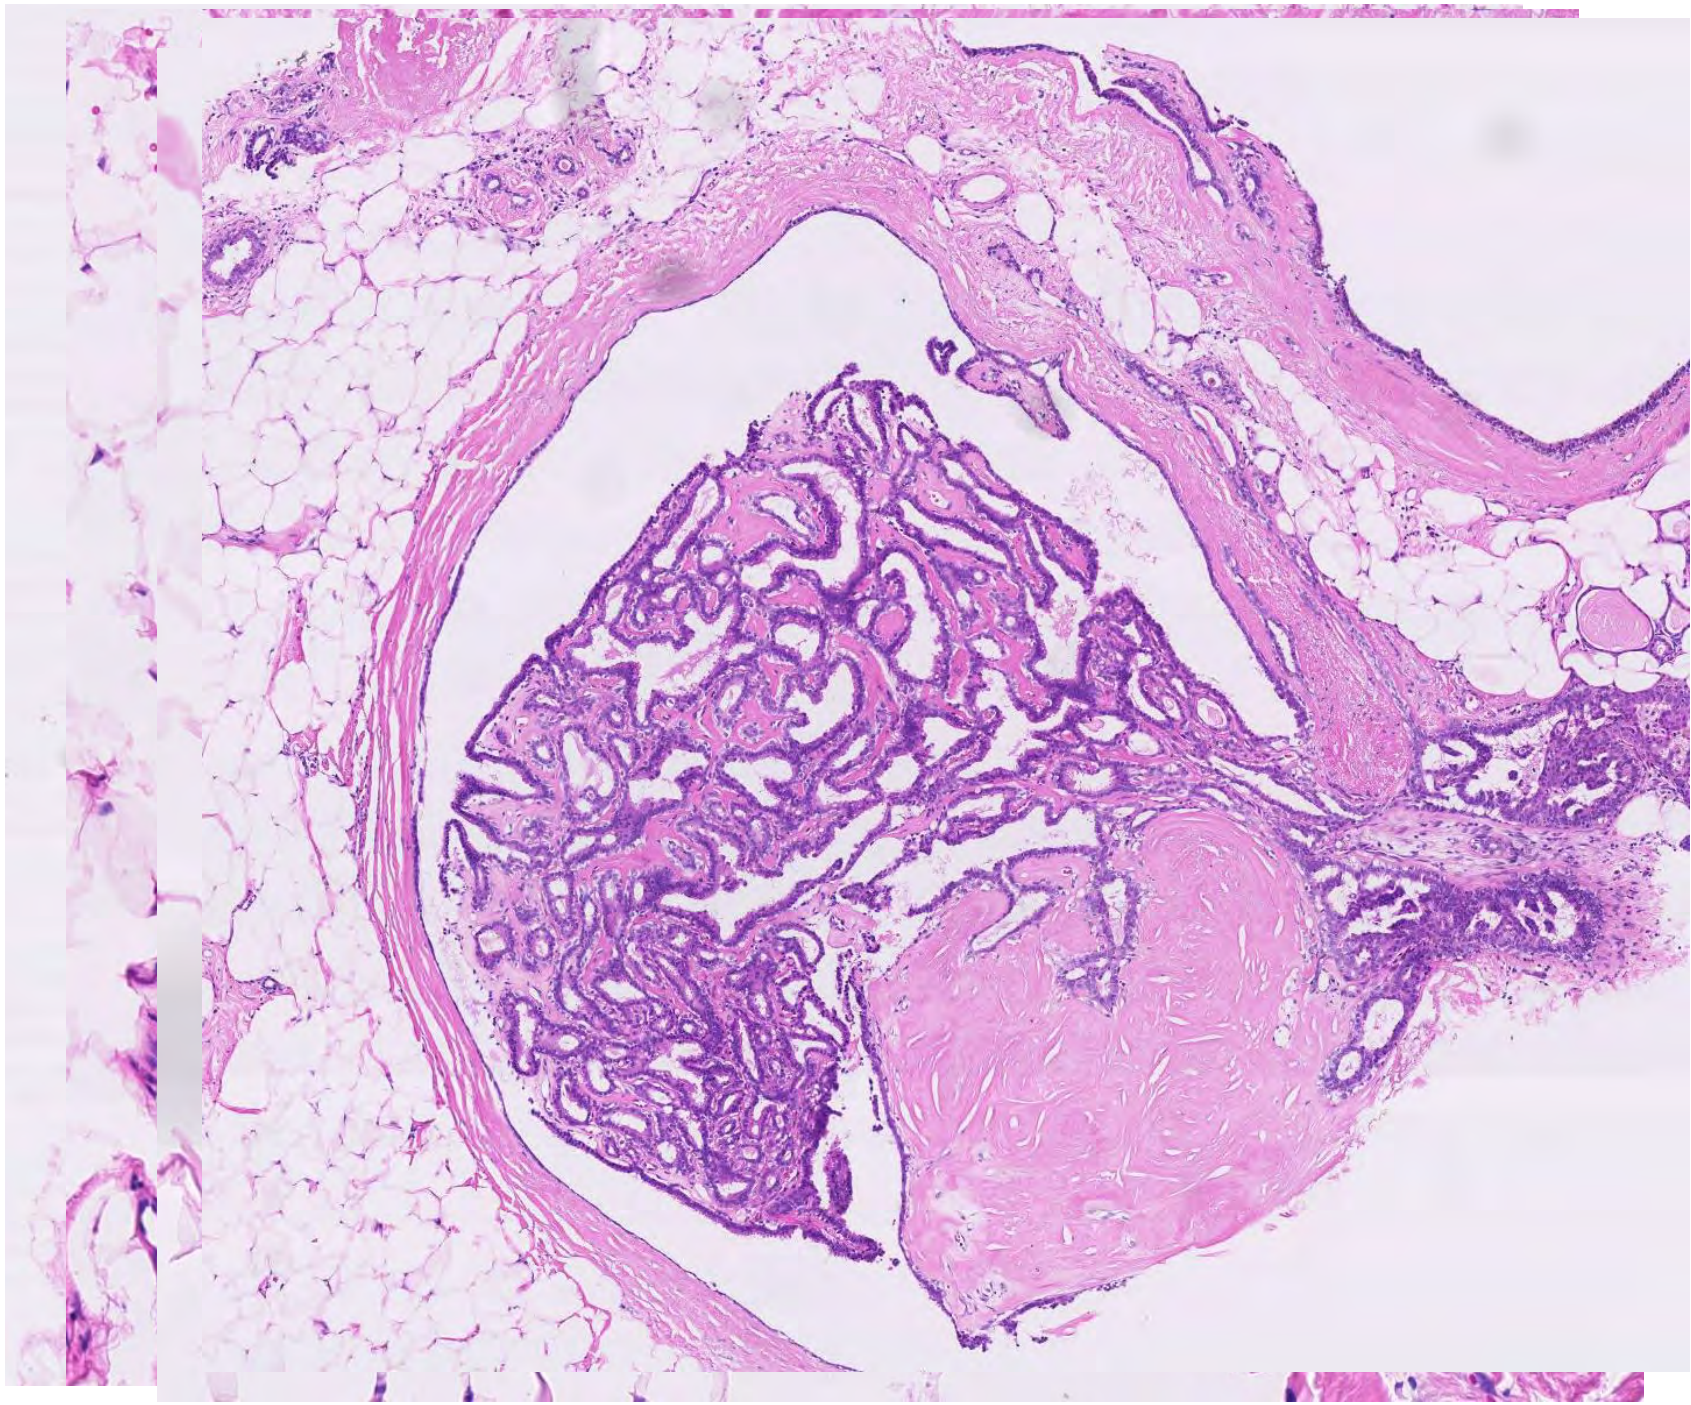

Aard materiaal

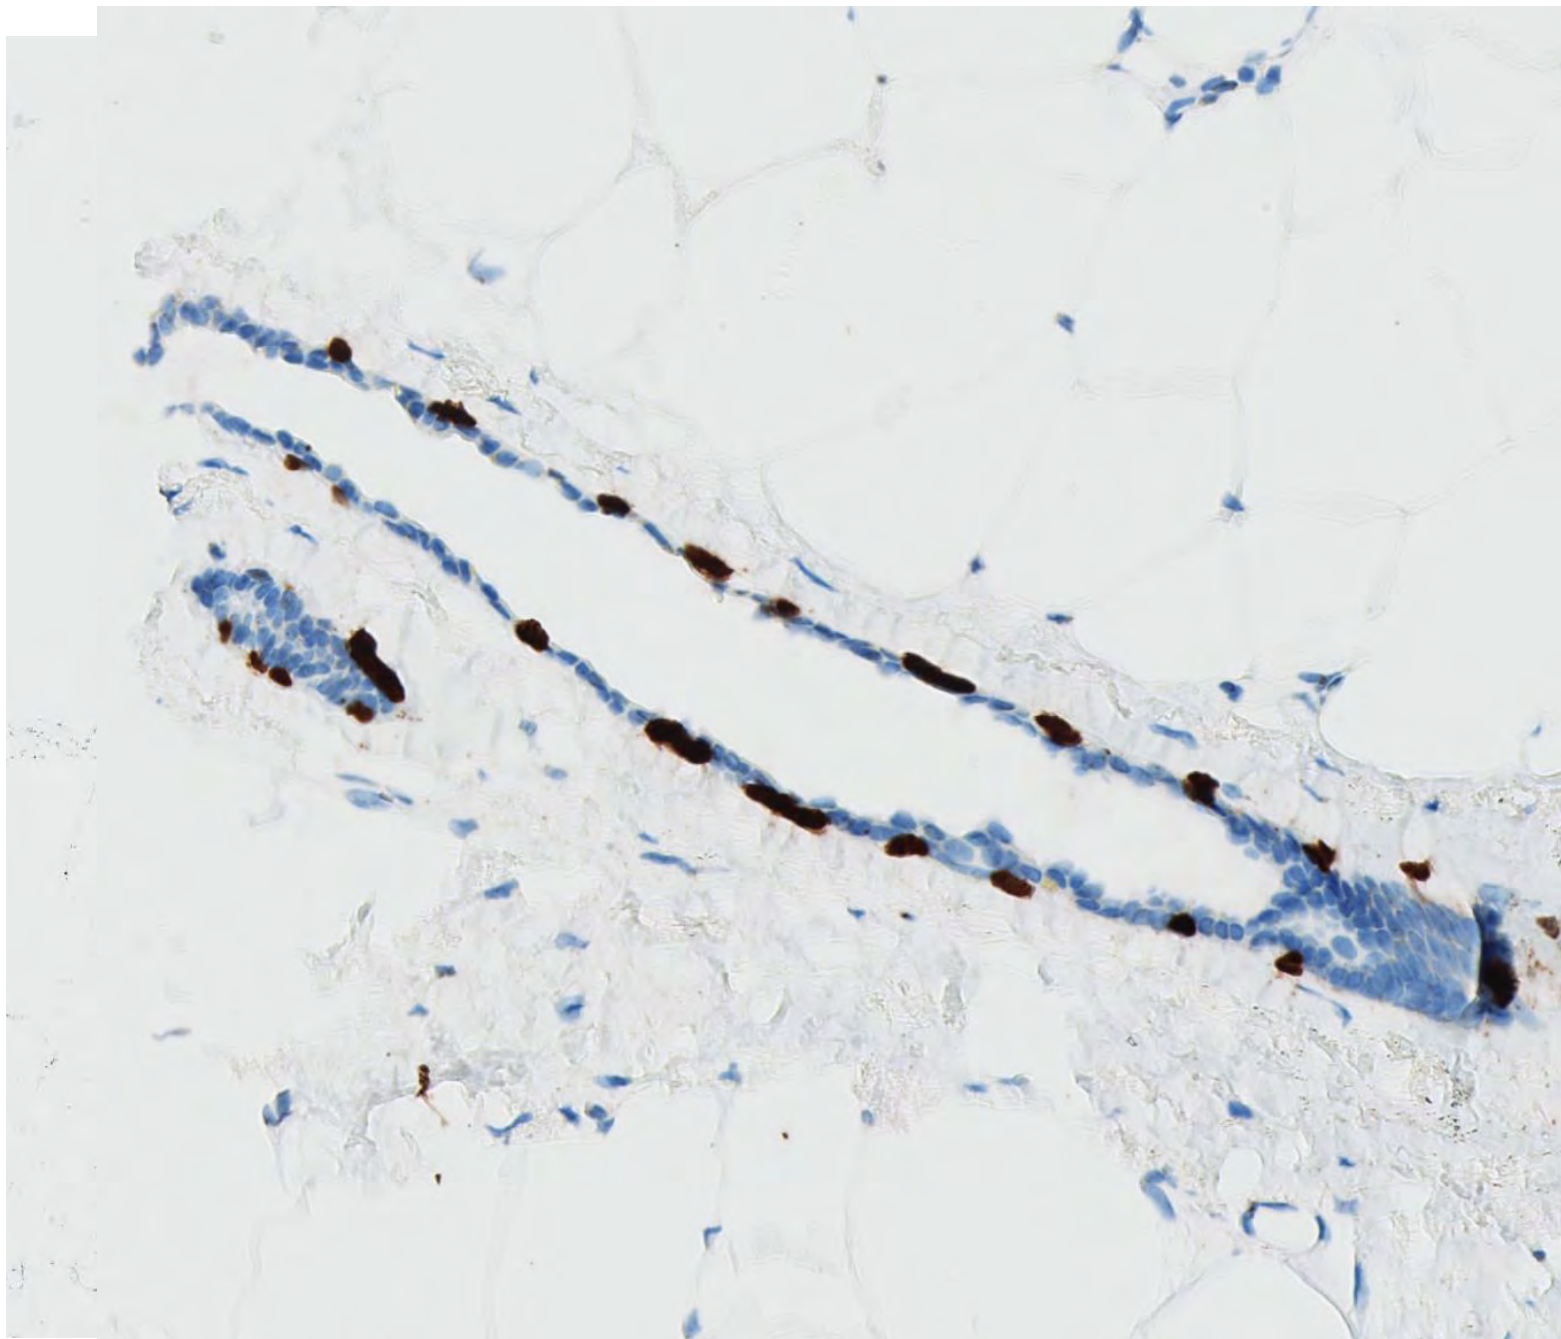

Vacuümbiopten mamma rechts.

Kliniek

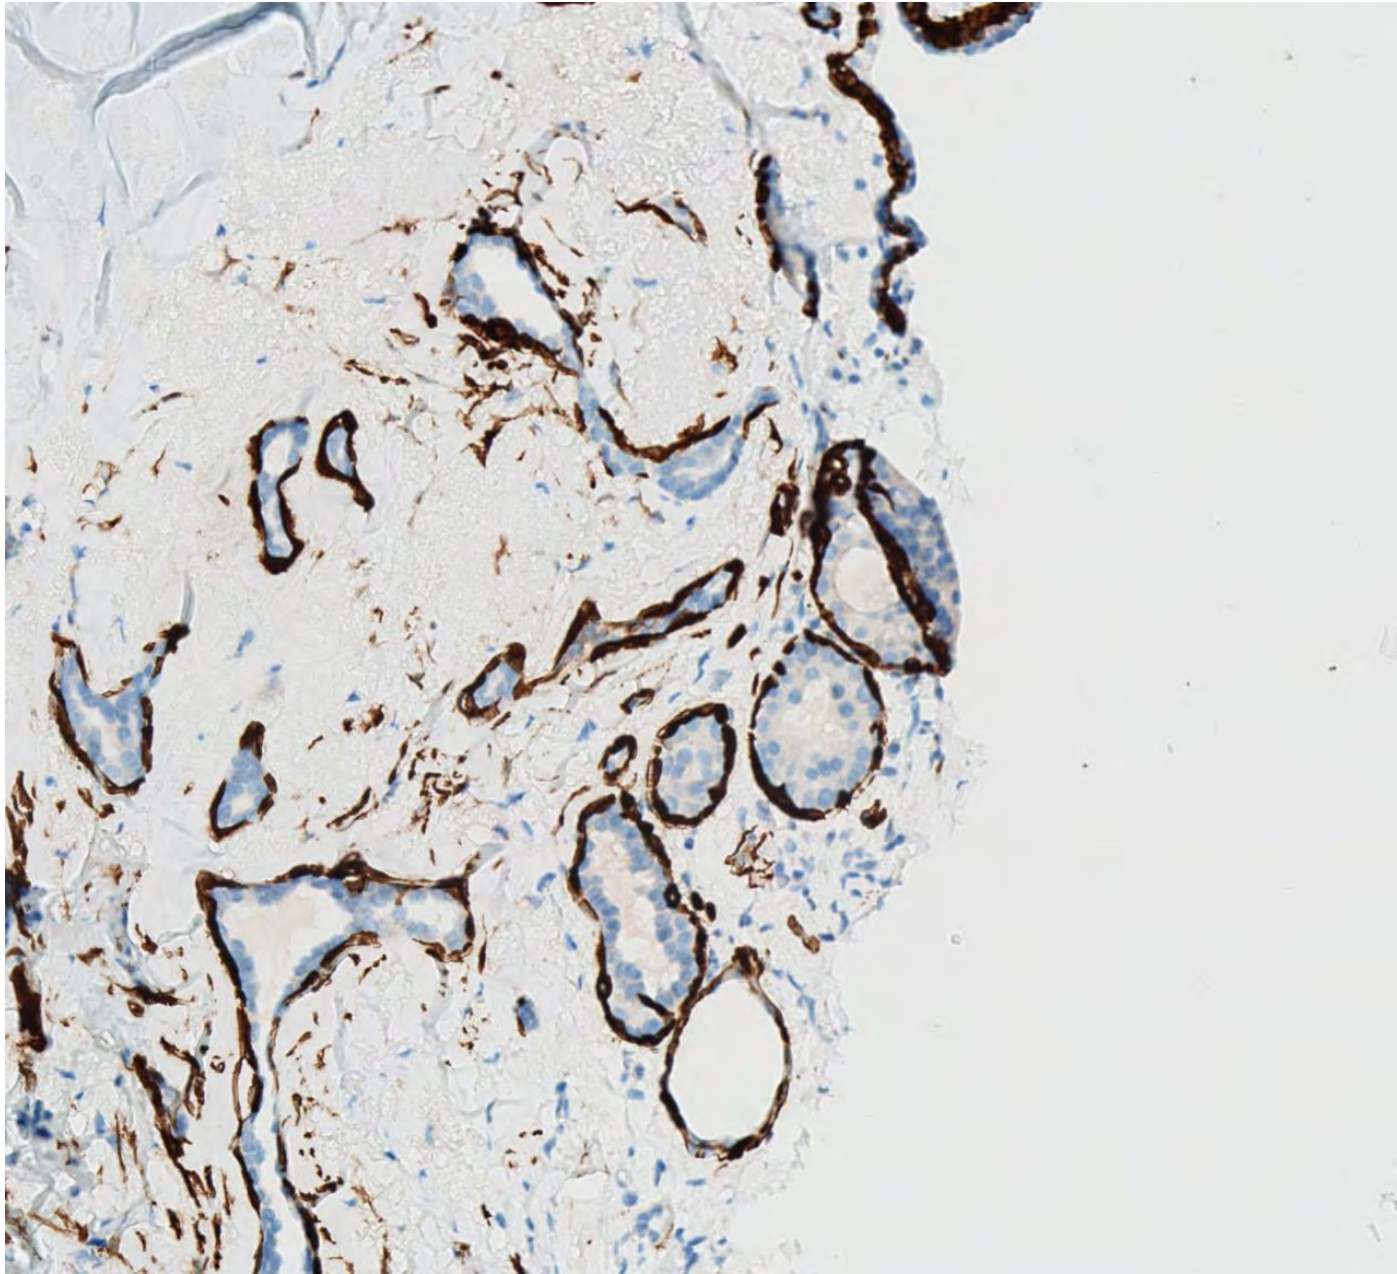

Architectuurverstoring LBQ rechts, na excisiebiopt, door TOMO duidelijker dan voorheen.

P63

calponine

CASUS 5B:

**Benigne, beeld doet denken aan een
complex scleroserende laesie waarbij
de corona is uitgeblust**

CASUS
6A

Klinische gegevens

♀ 57

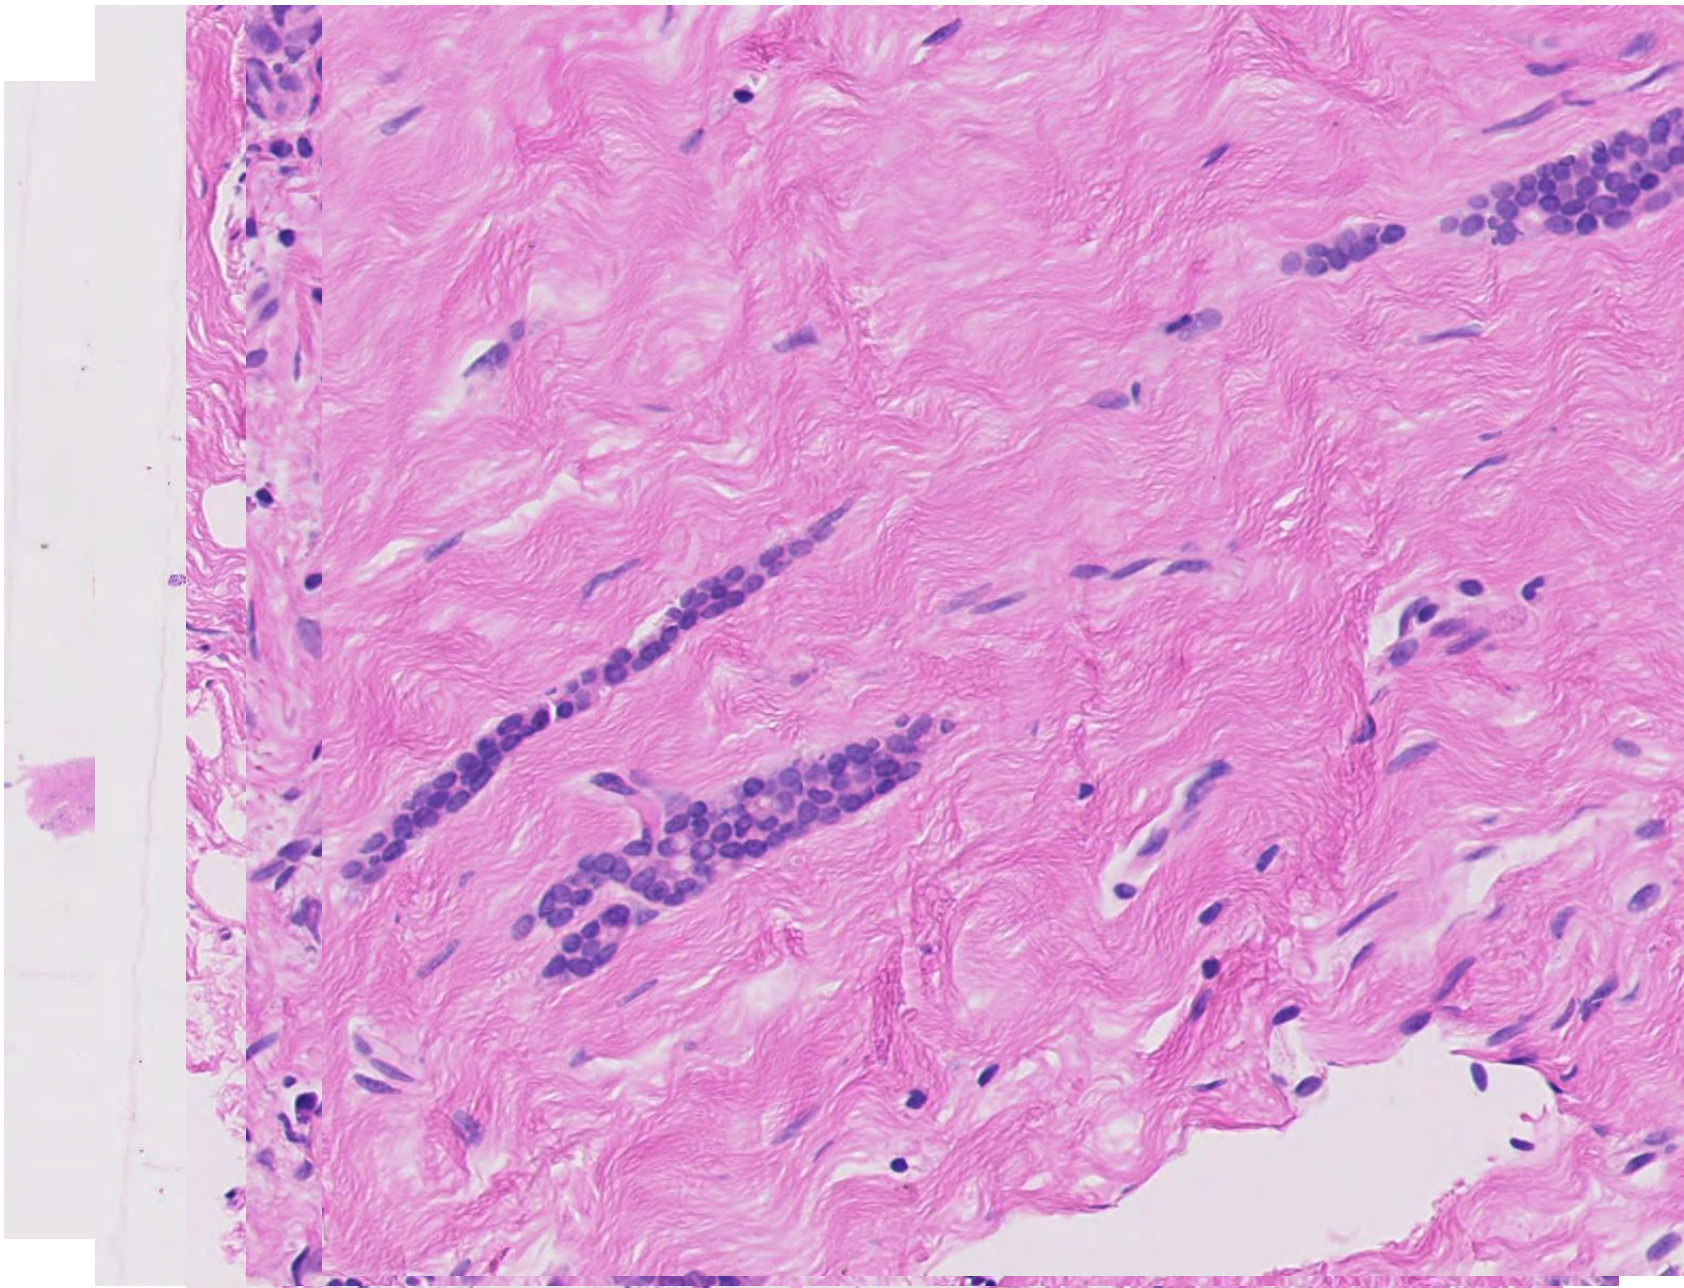

Voorgeschiedenis

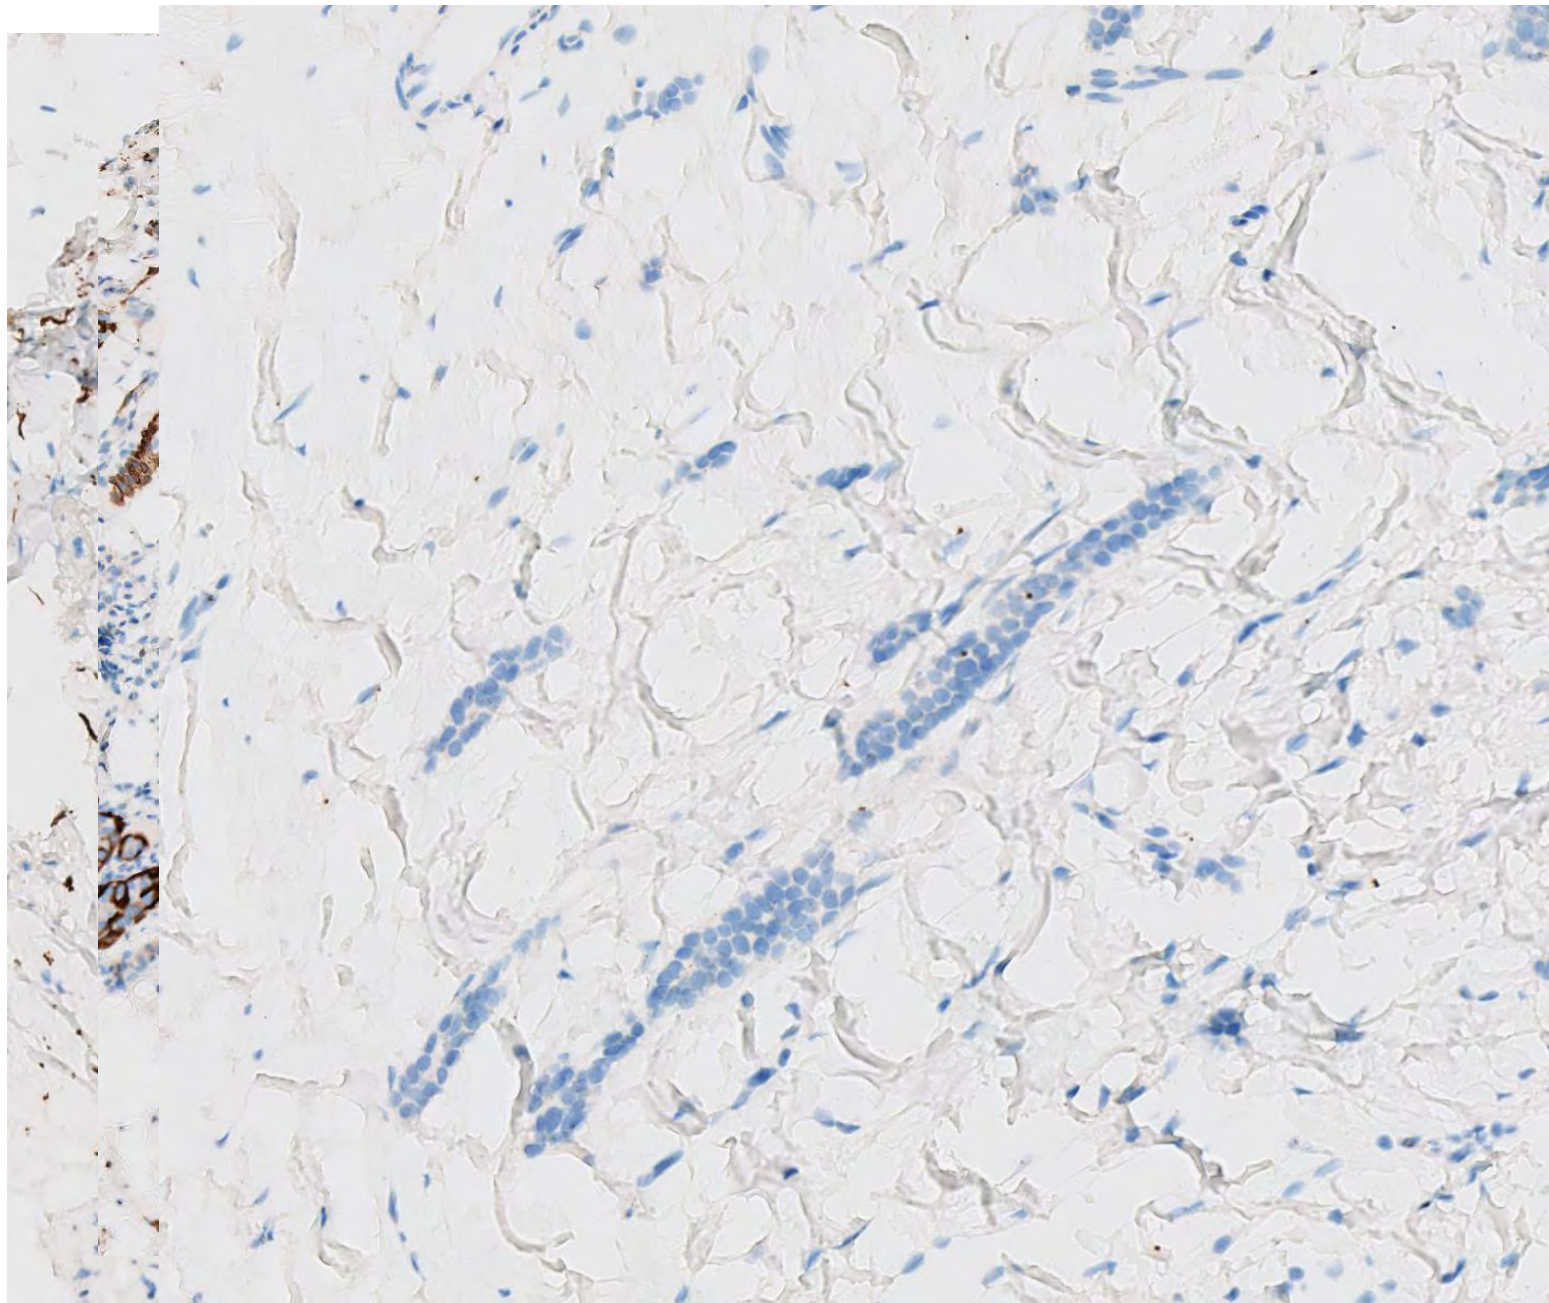

Infiltrerend lobulair carcinoom links (lumpectomie), radicaal verwijderd, SN negatief (2018).

Aard materiaal

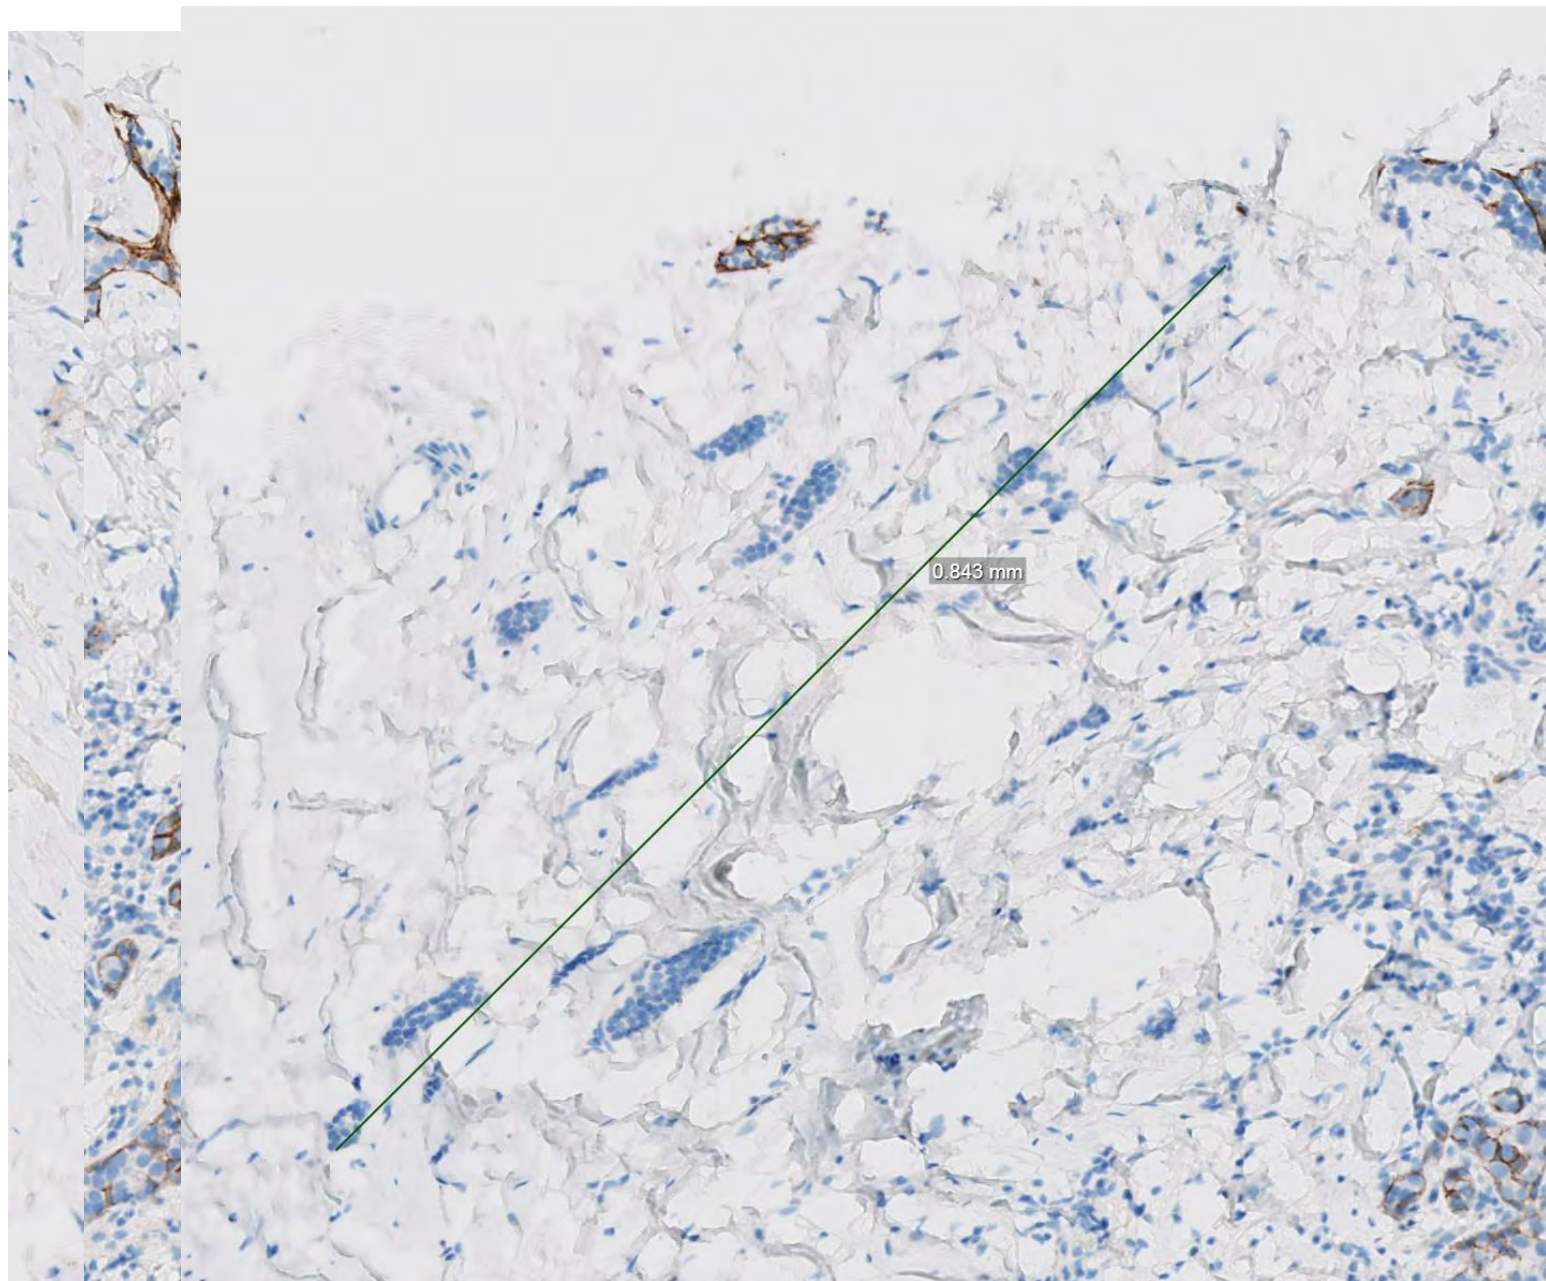

Stereotactische biopten mamma links

Kliniek Architectuurverstoring mamma links

calponine

E-cadherine

CASUS 6A:
Infiltrerend lobulair
carcinoom met aangrenzend
scleroserende adenosis met
lobulair-carcinoma-in-situ

CASUS
6B

Klinische gegevens

♀ 30

Voorgeschiedenis

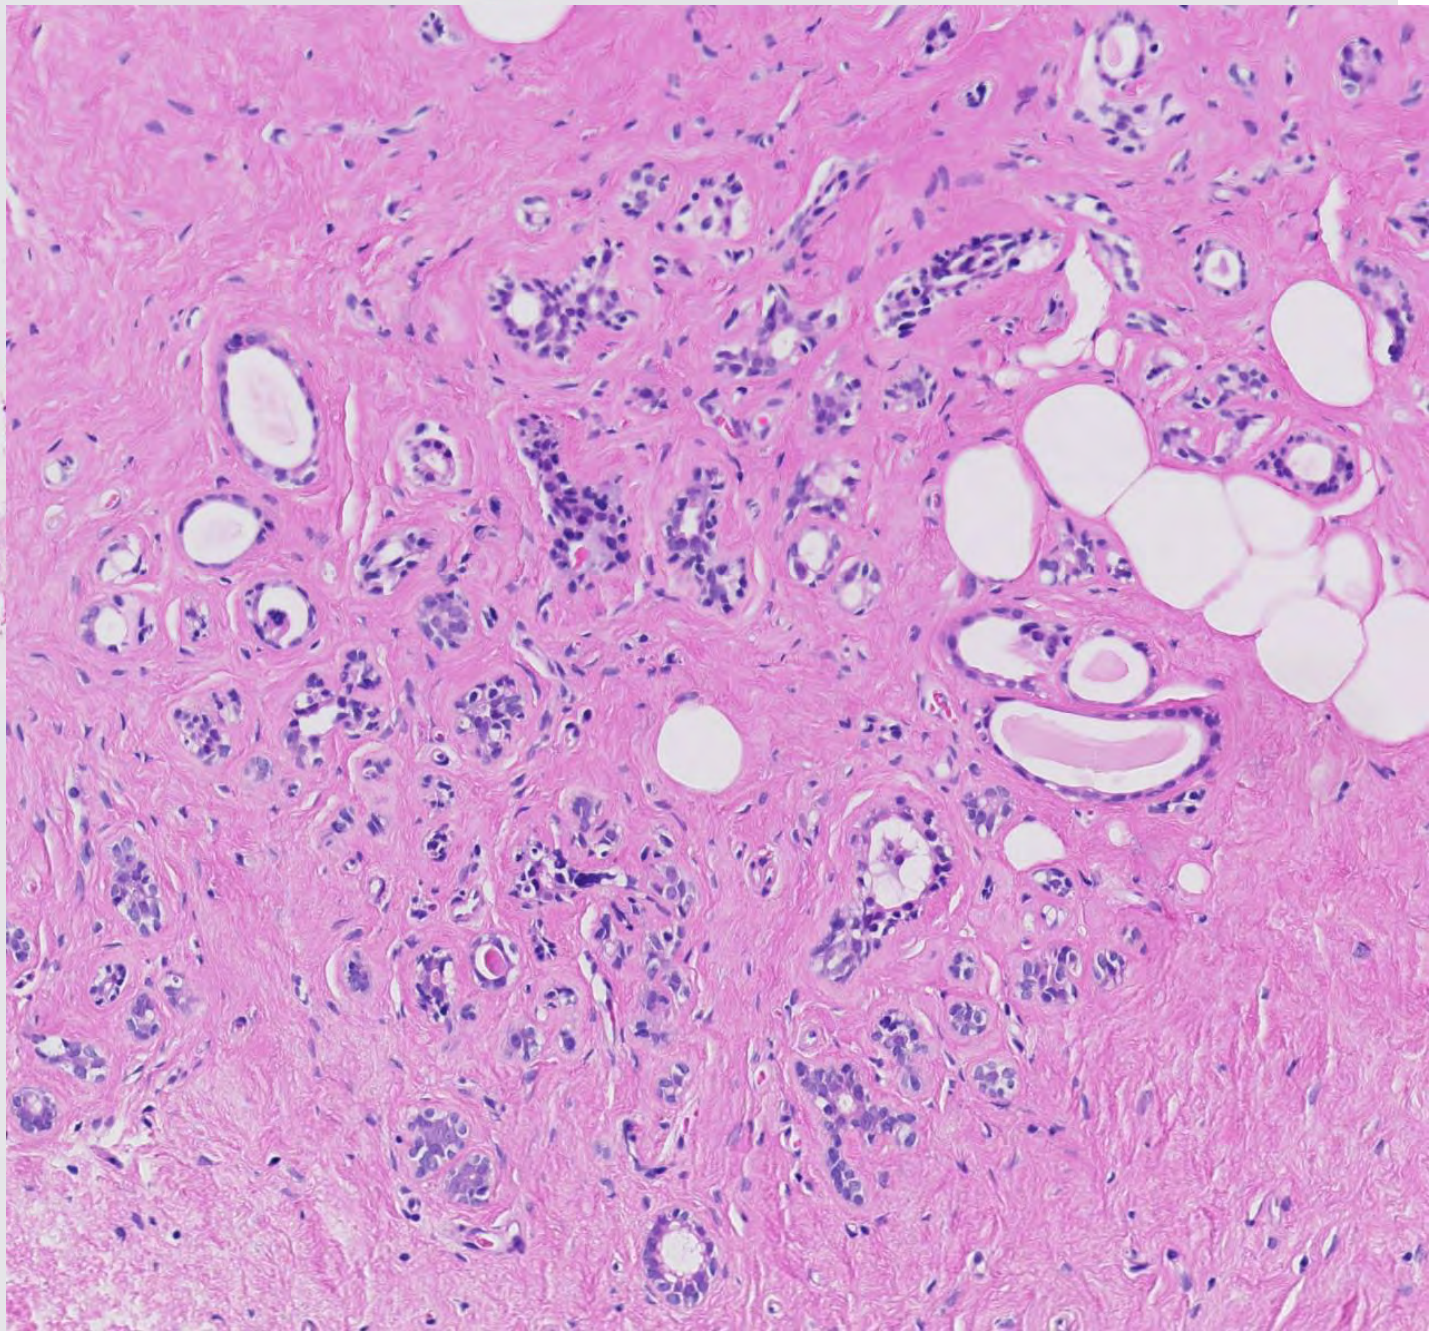

BRCA, bekend met fibroadenomen

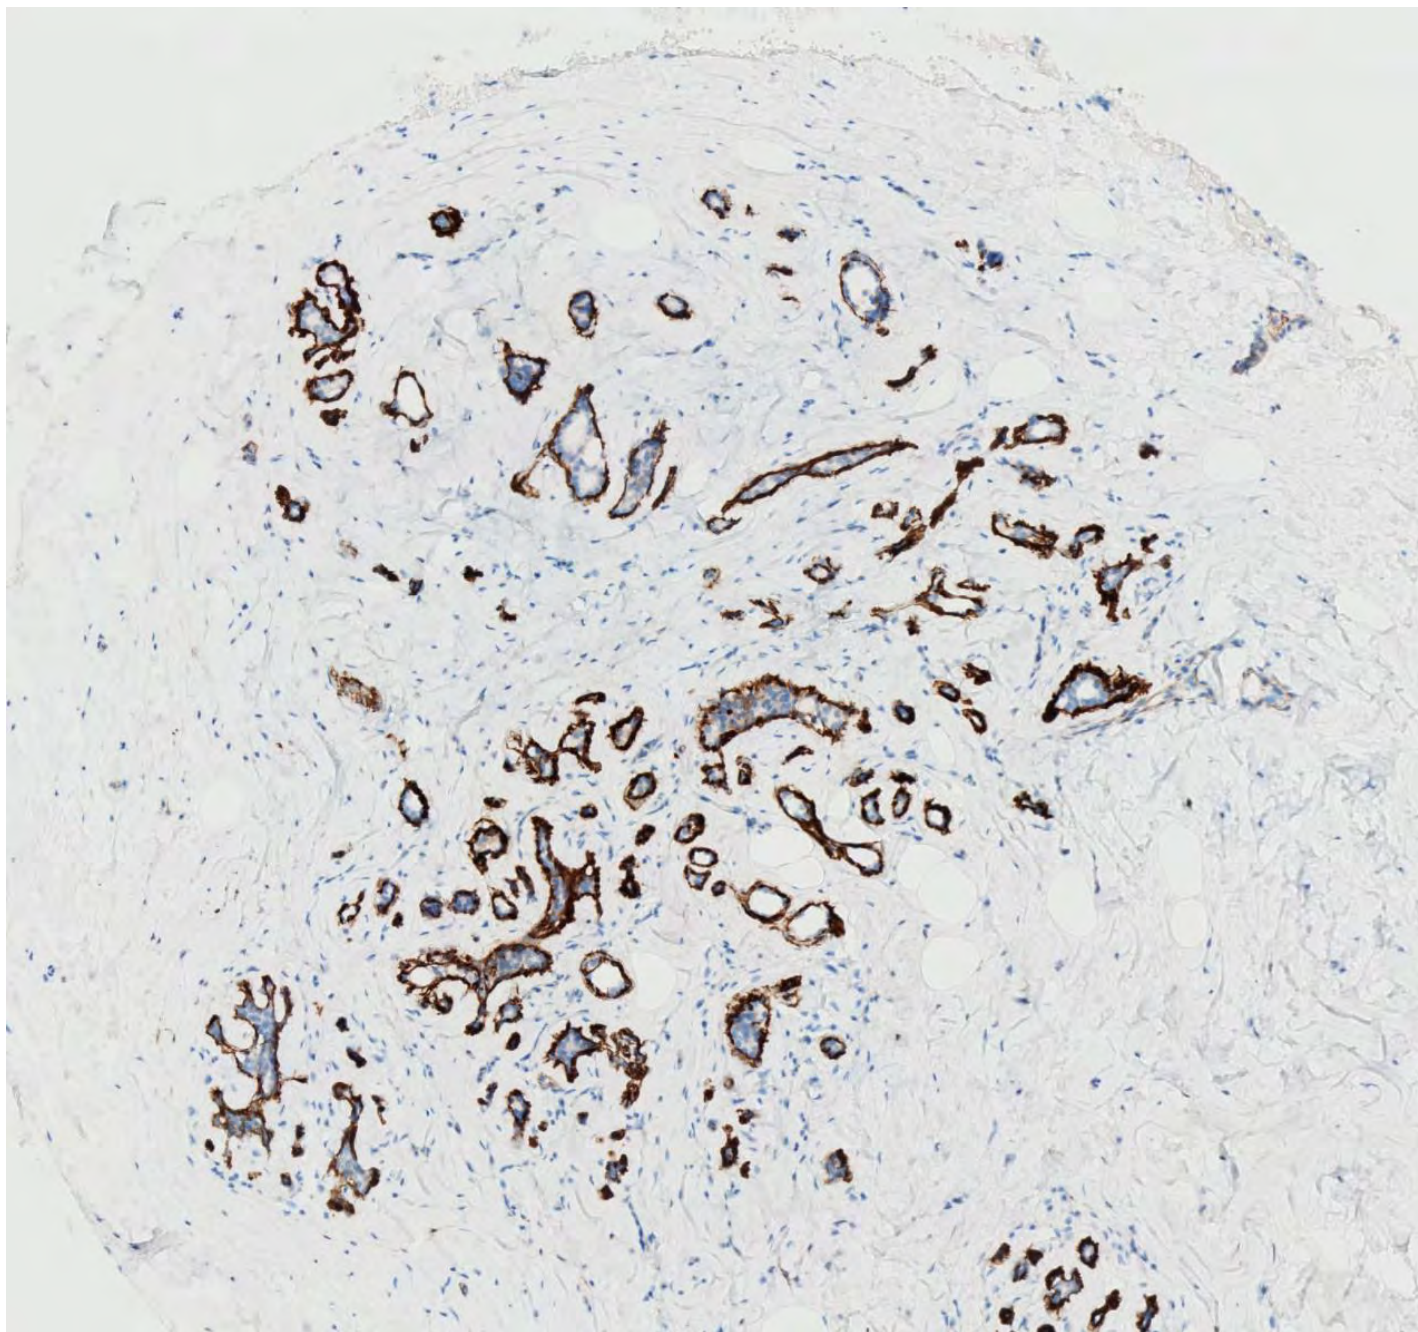

Aard materiaal

MRI geleid biopt rechter mamma

Kliniek

Aankleuring rechts bij BRCA

calponine

CASUS 6B:
Scleroserende adenosis

CASUS
7A

Klinische gegevens

♀ **51**

Voorgeschiedenis

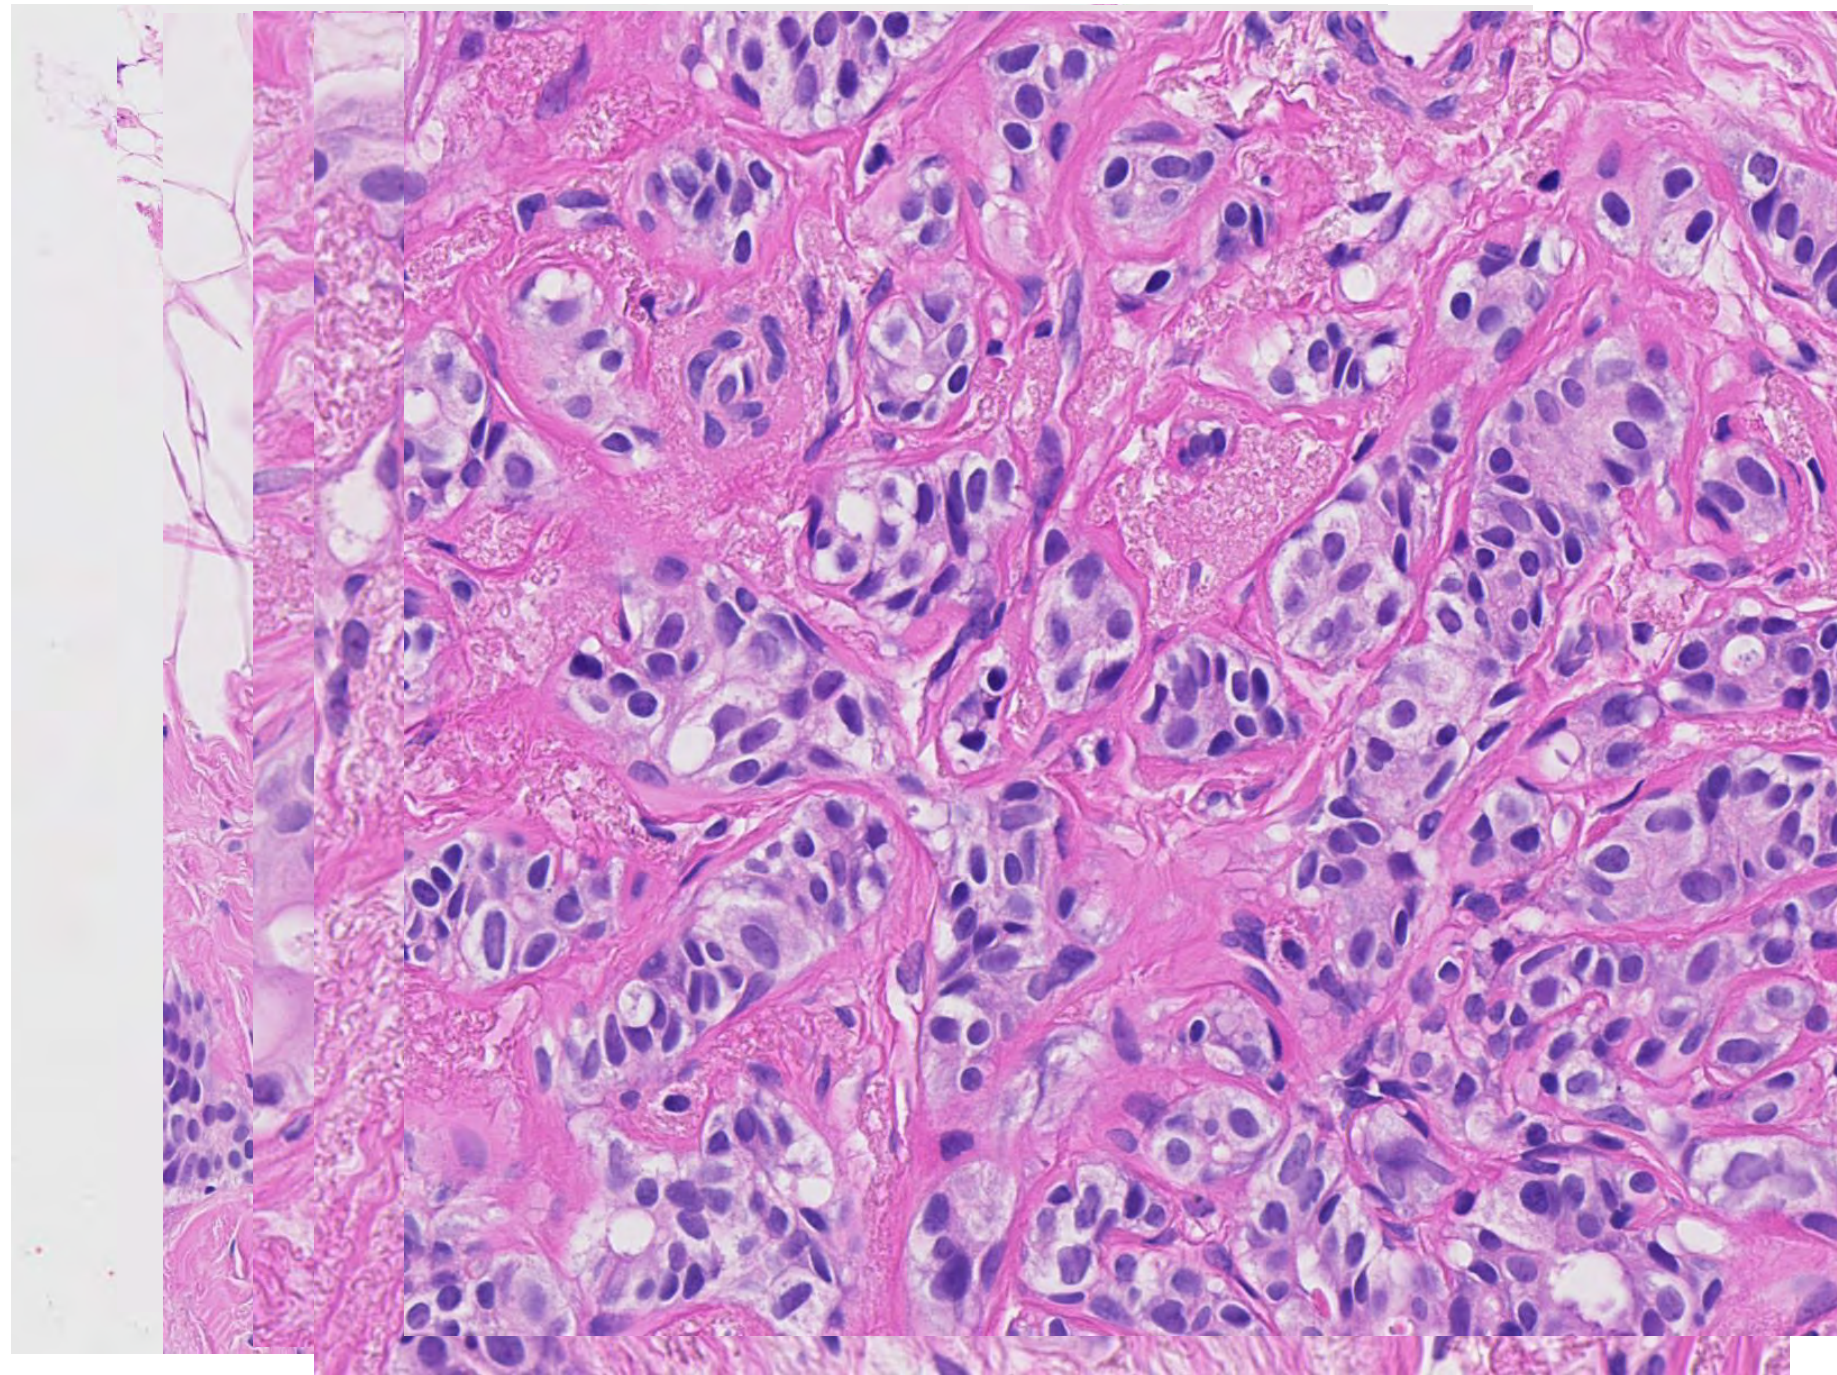

Nodulair melanoom (2004).

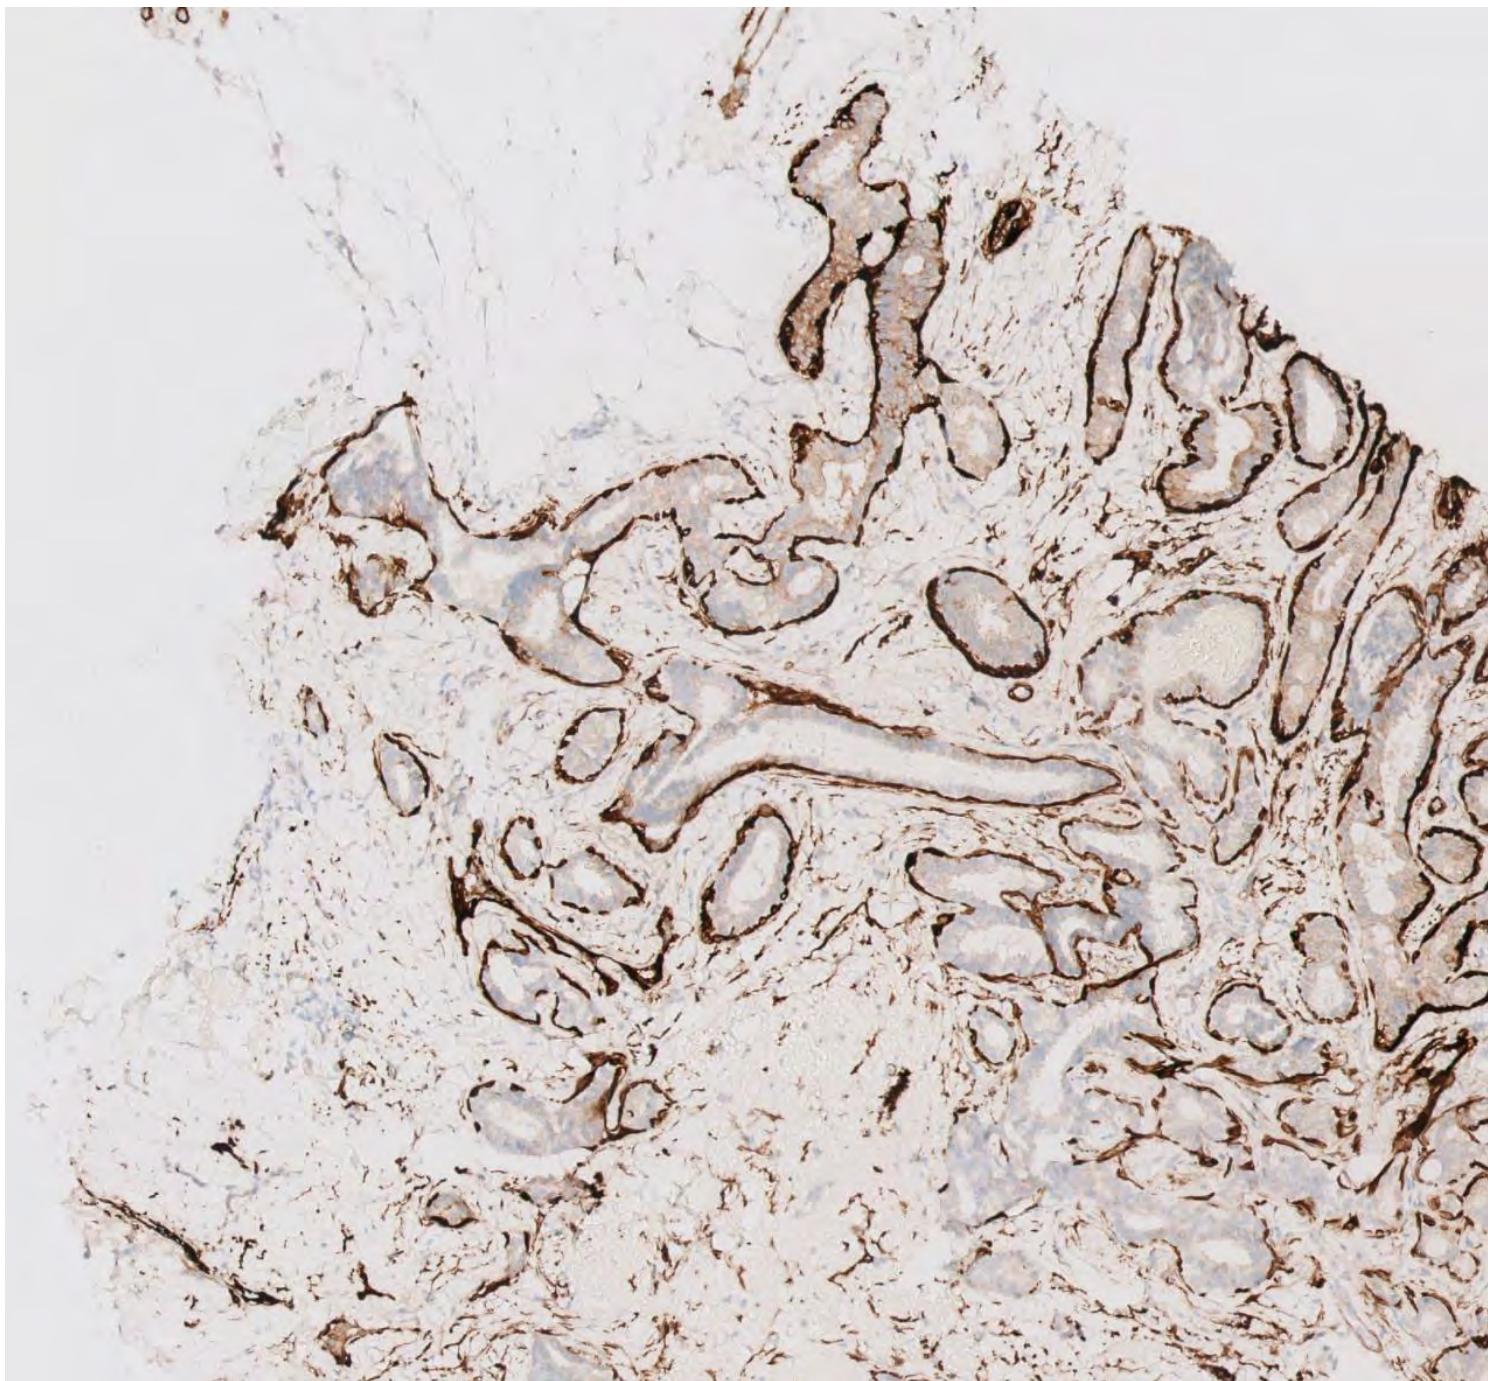

Aard materiaal

Biopten

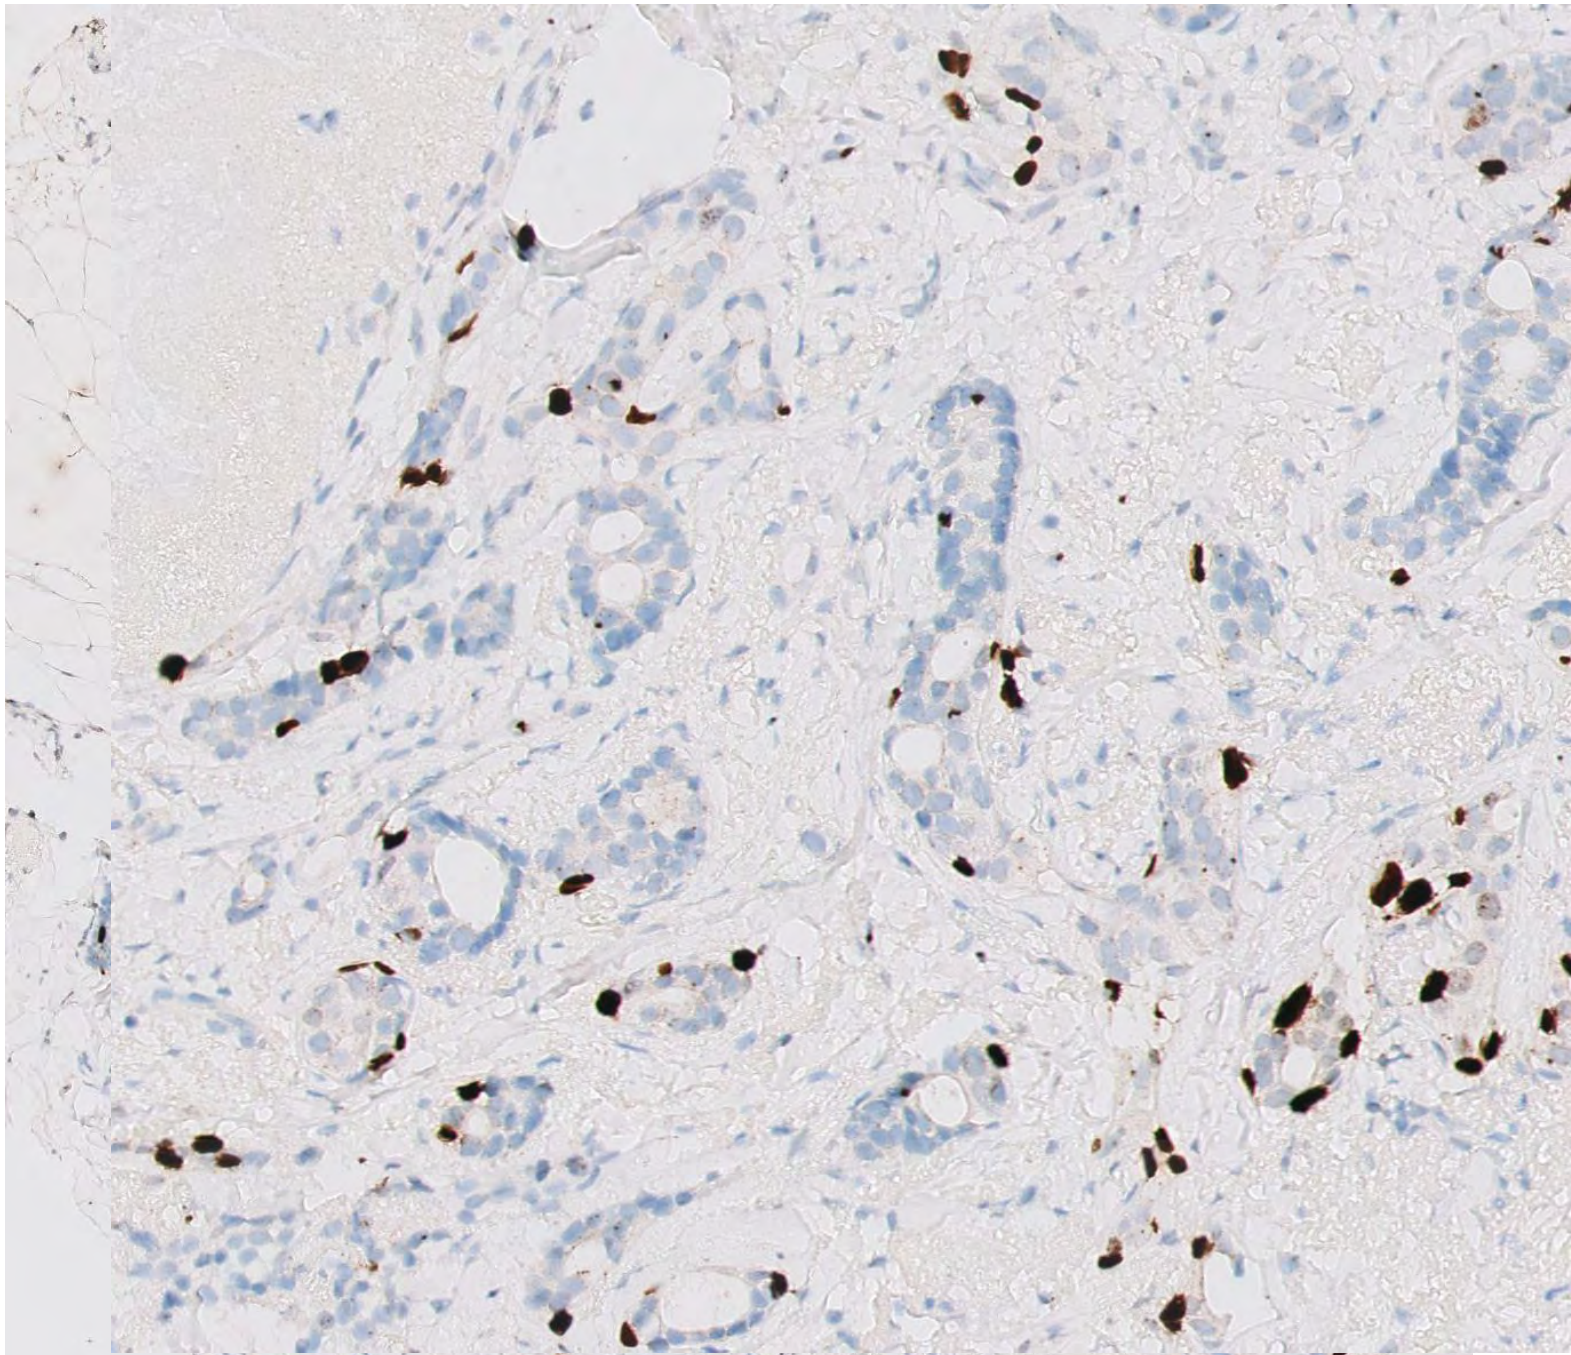

Kliniek

birads V laesie laterale bovenkwadrant
links.

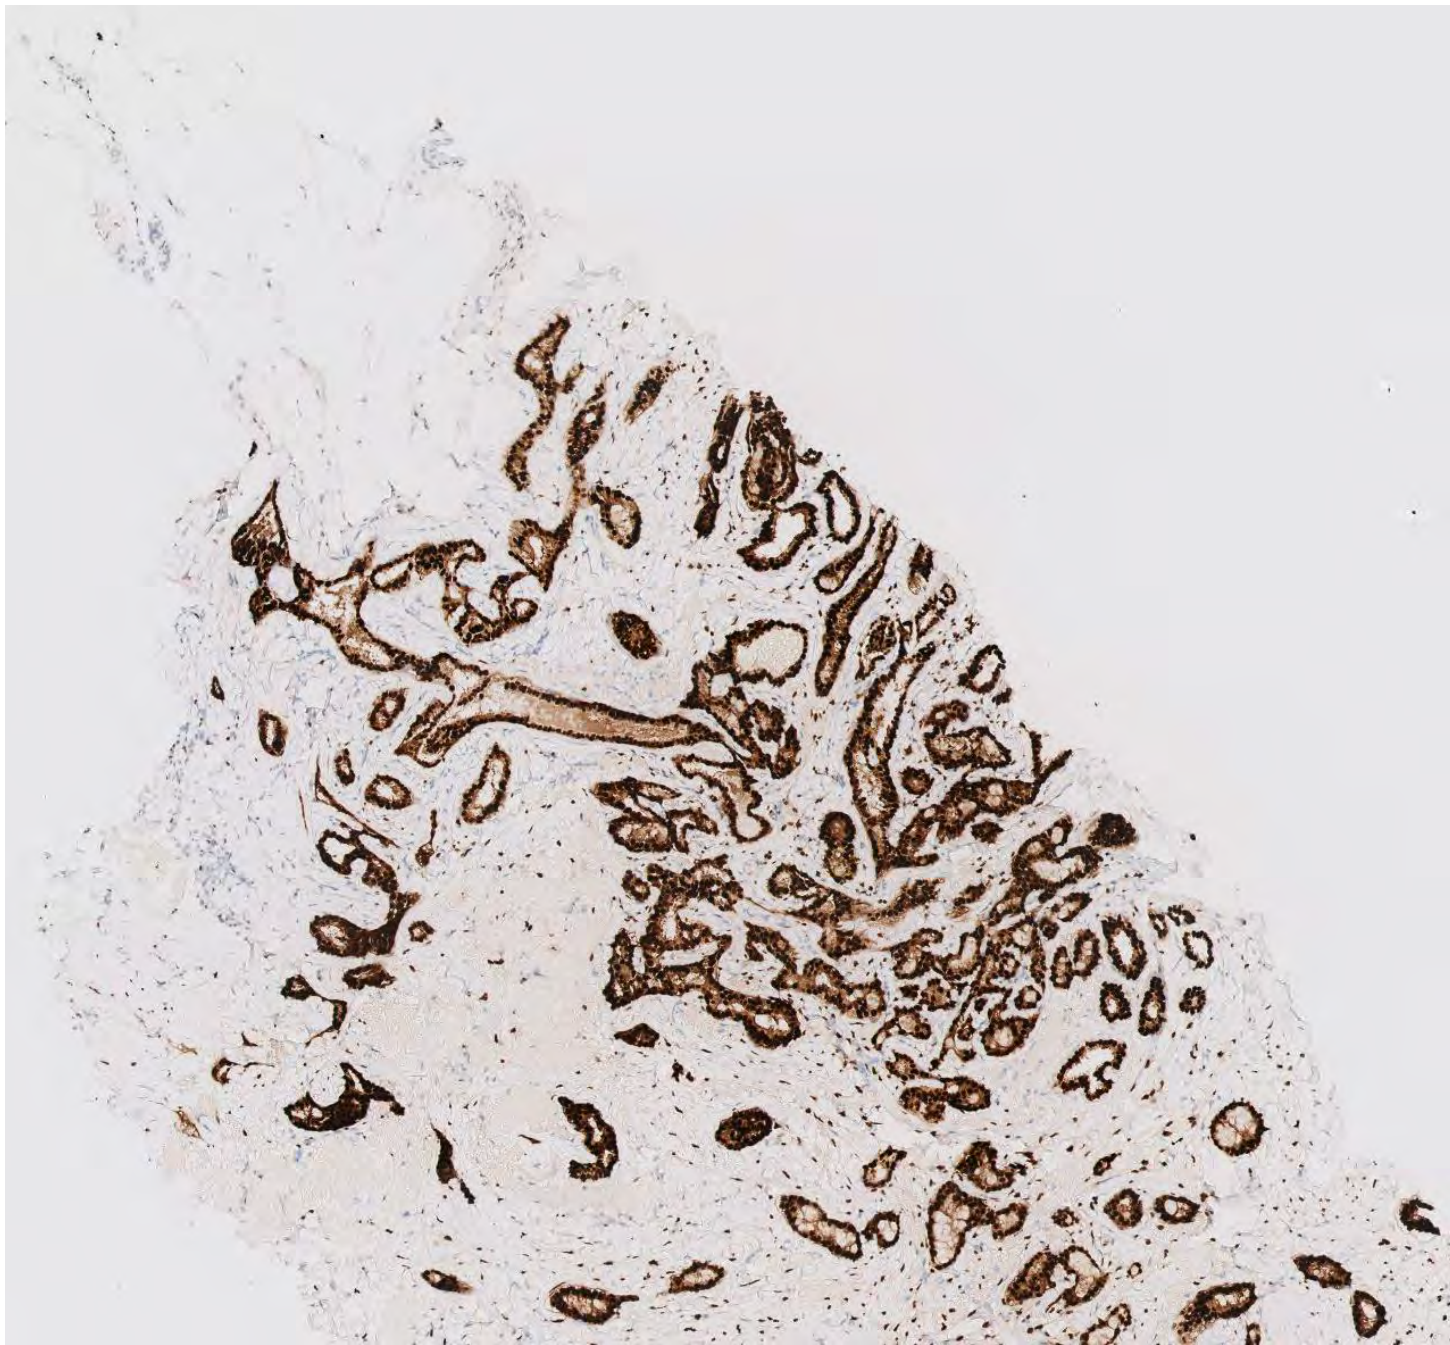

calponine

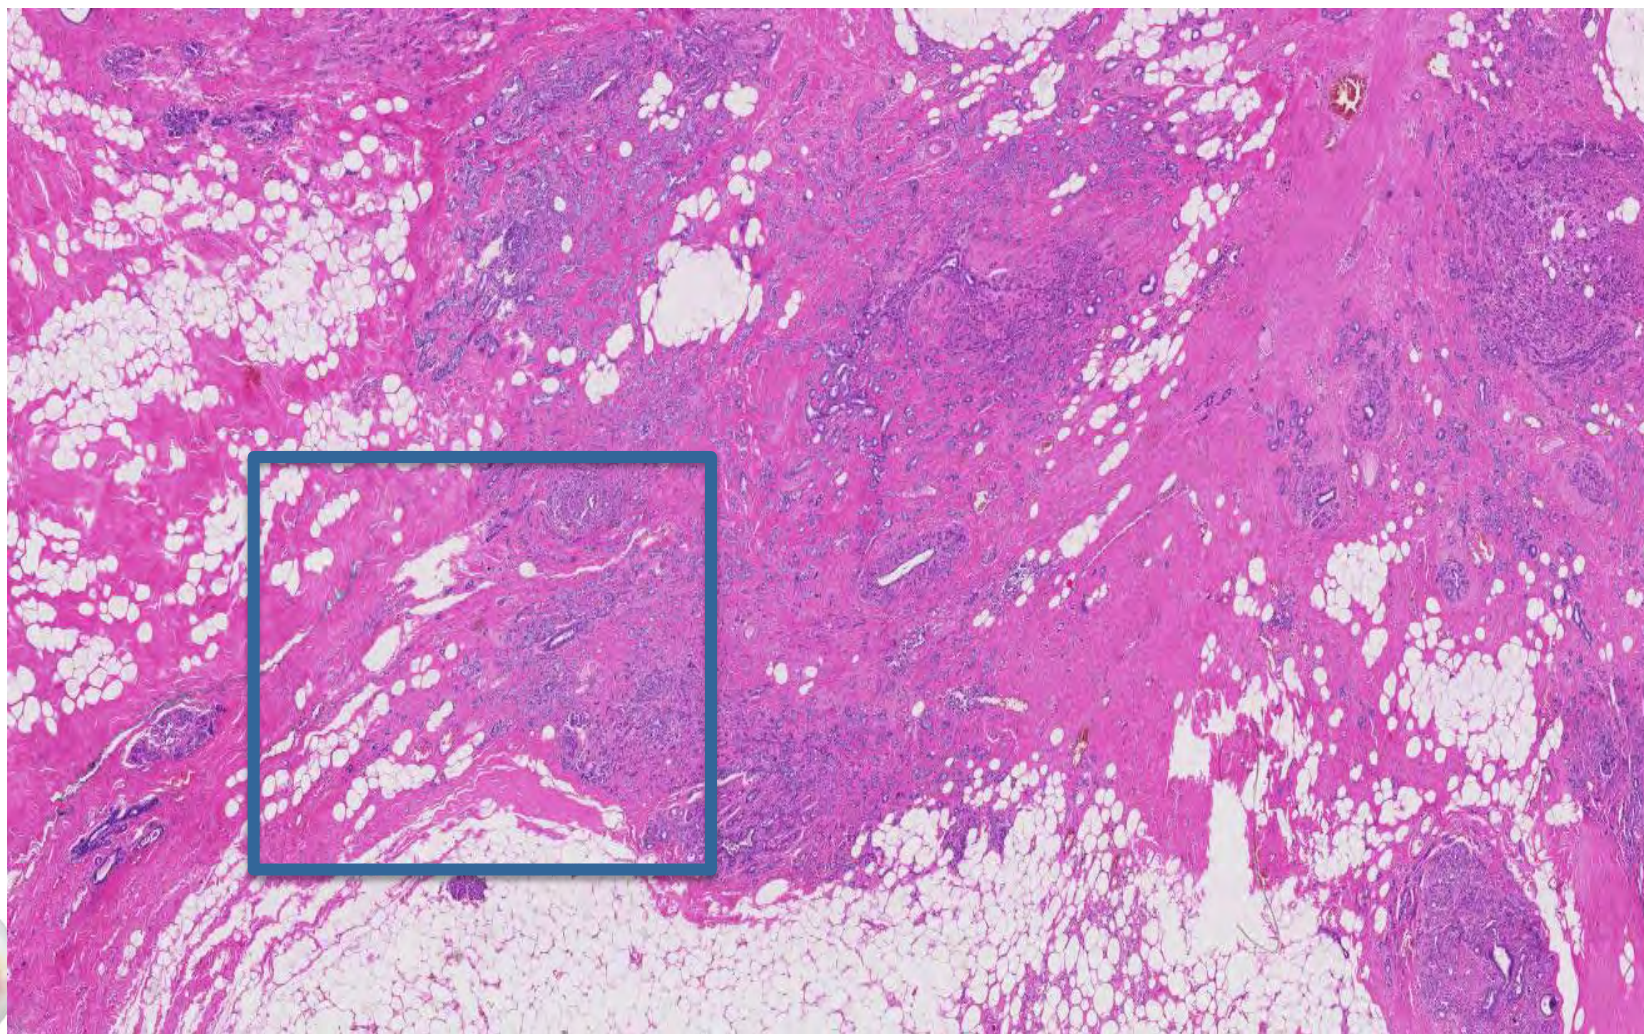

P63

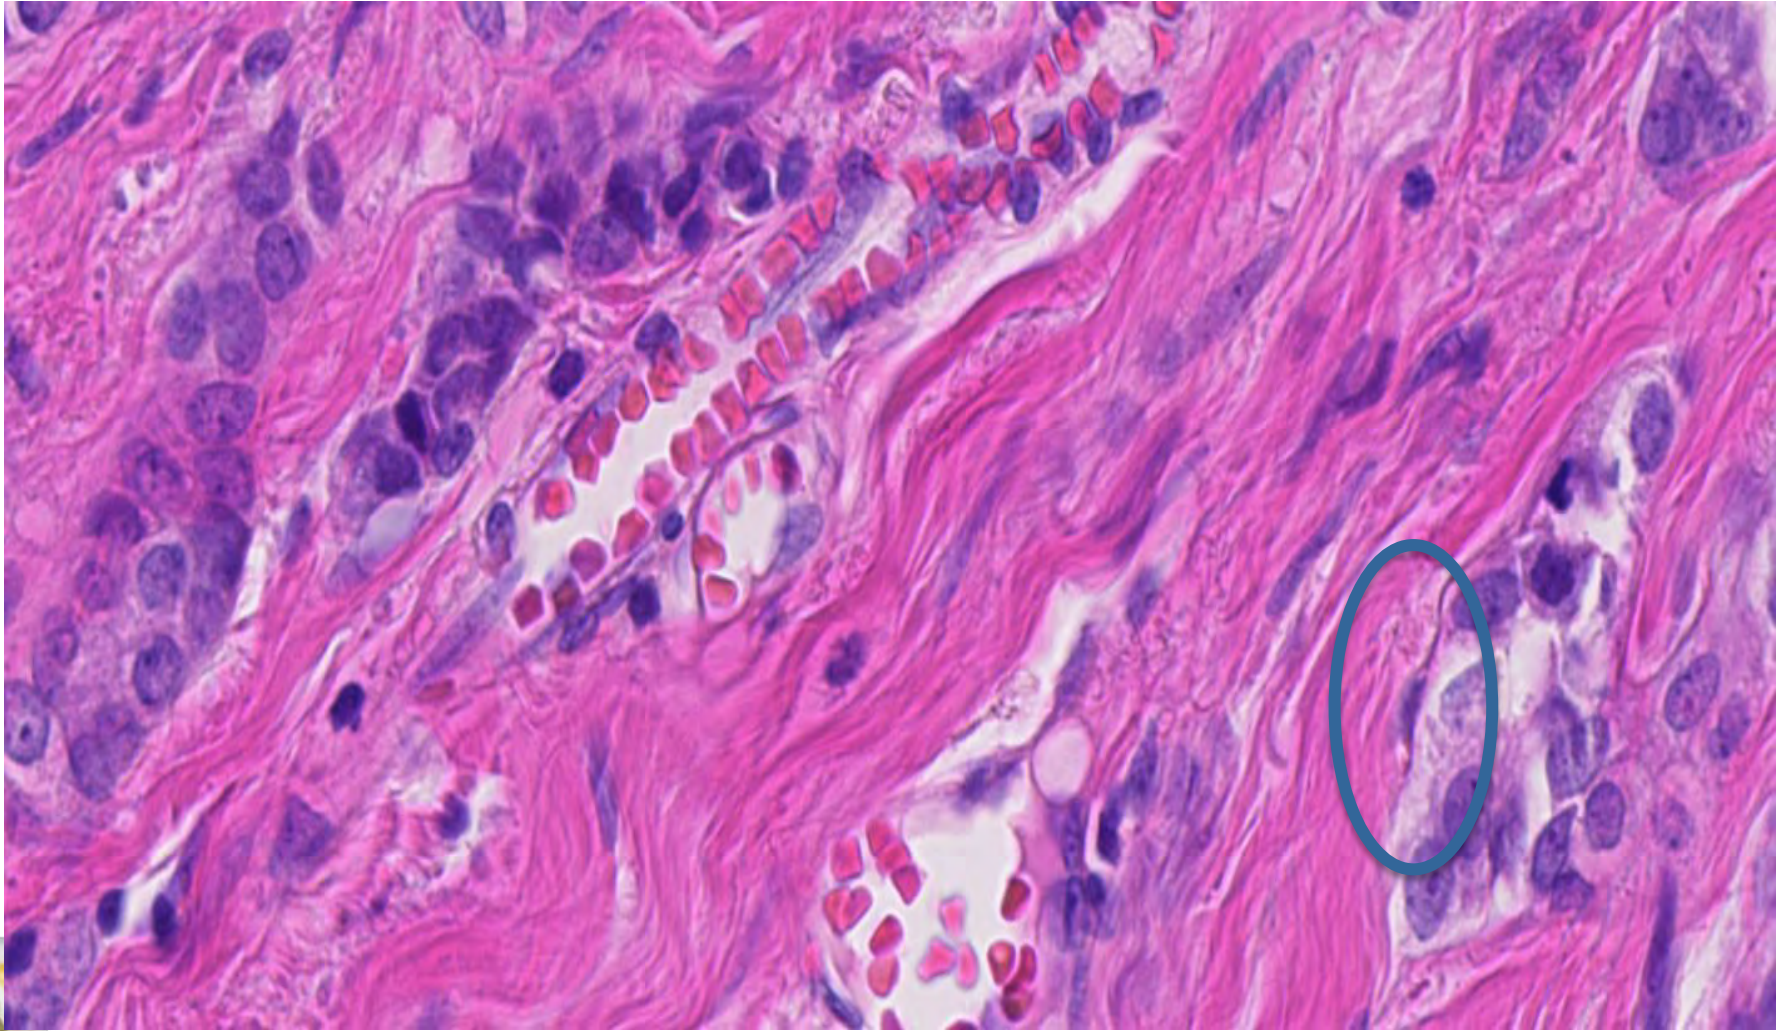

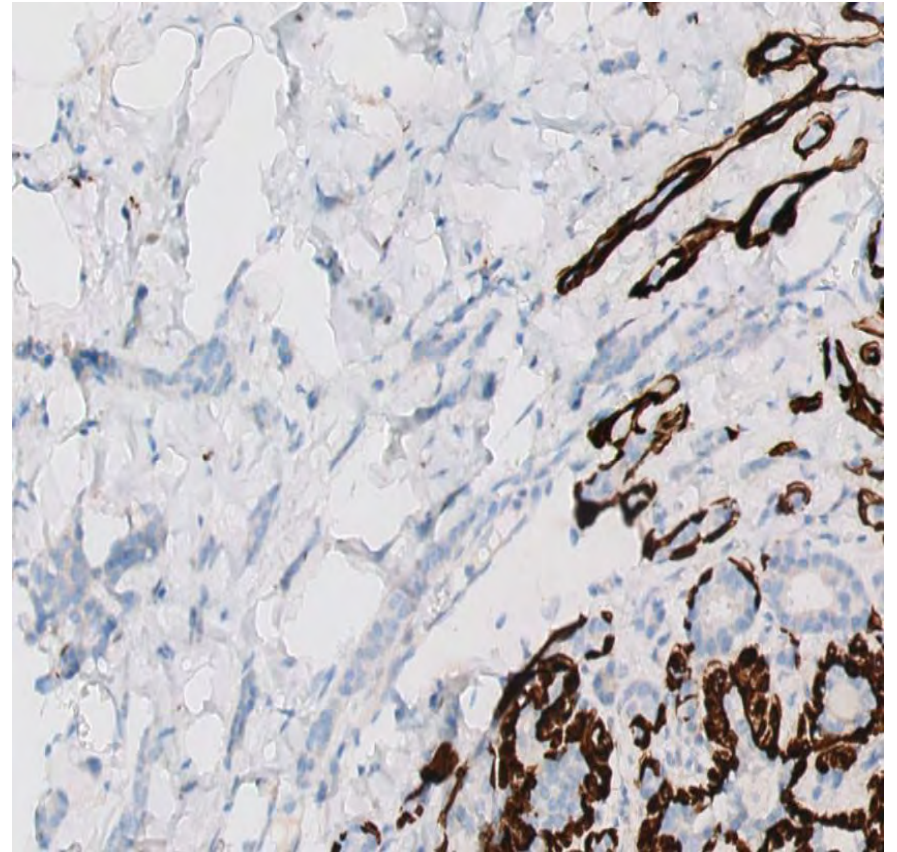

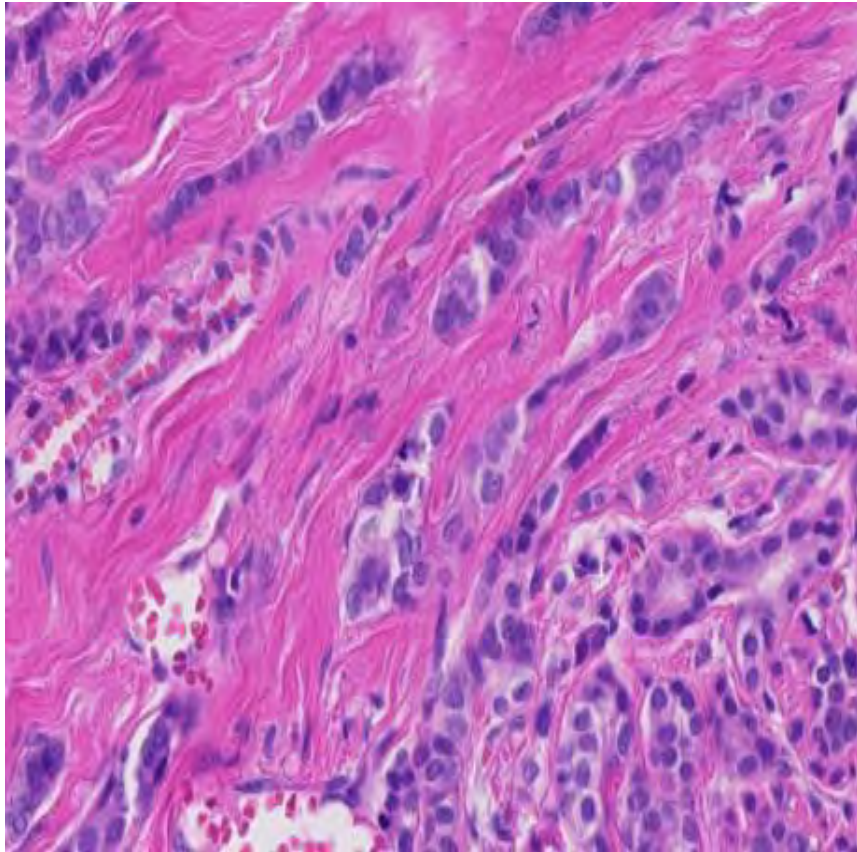

P63

CASUS 7A:

Mammabiopt: lastig te classificeren laesie waarbij op differentiaal diagnostisch gedacht kan worden aan een scleroserende adenosis danwel een infiltrerend carcinoom NST. Definitieve diagnose op excisie. Graag bespreken MDO.

Calponine
kleuring

CASUS 7A, resectie:
Mamma lumpectomie links (laterale
bovenkwadrant): invasief carcinoom NST,
Bloom & Richardson graad 1, diameter 1,8
cm

CASUS
7B

Klinische gegevens

♀ 72

Voorgeschiedenis

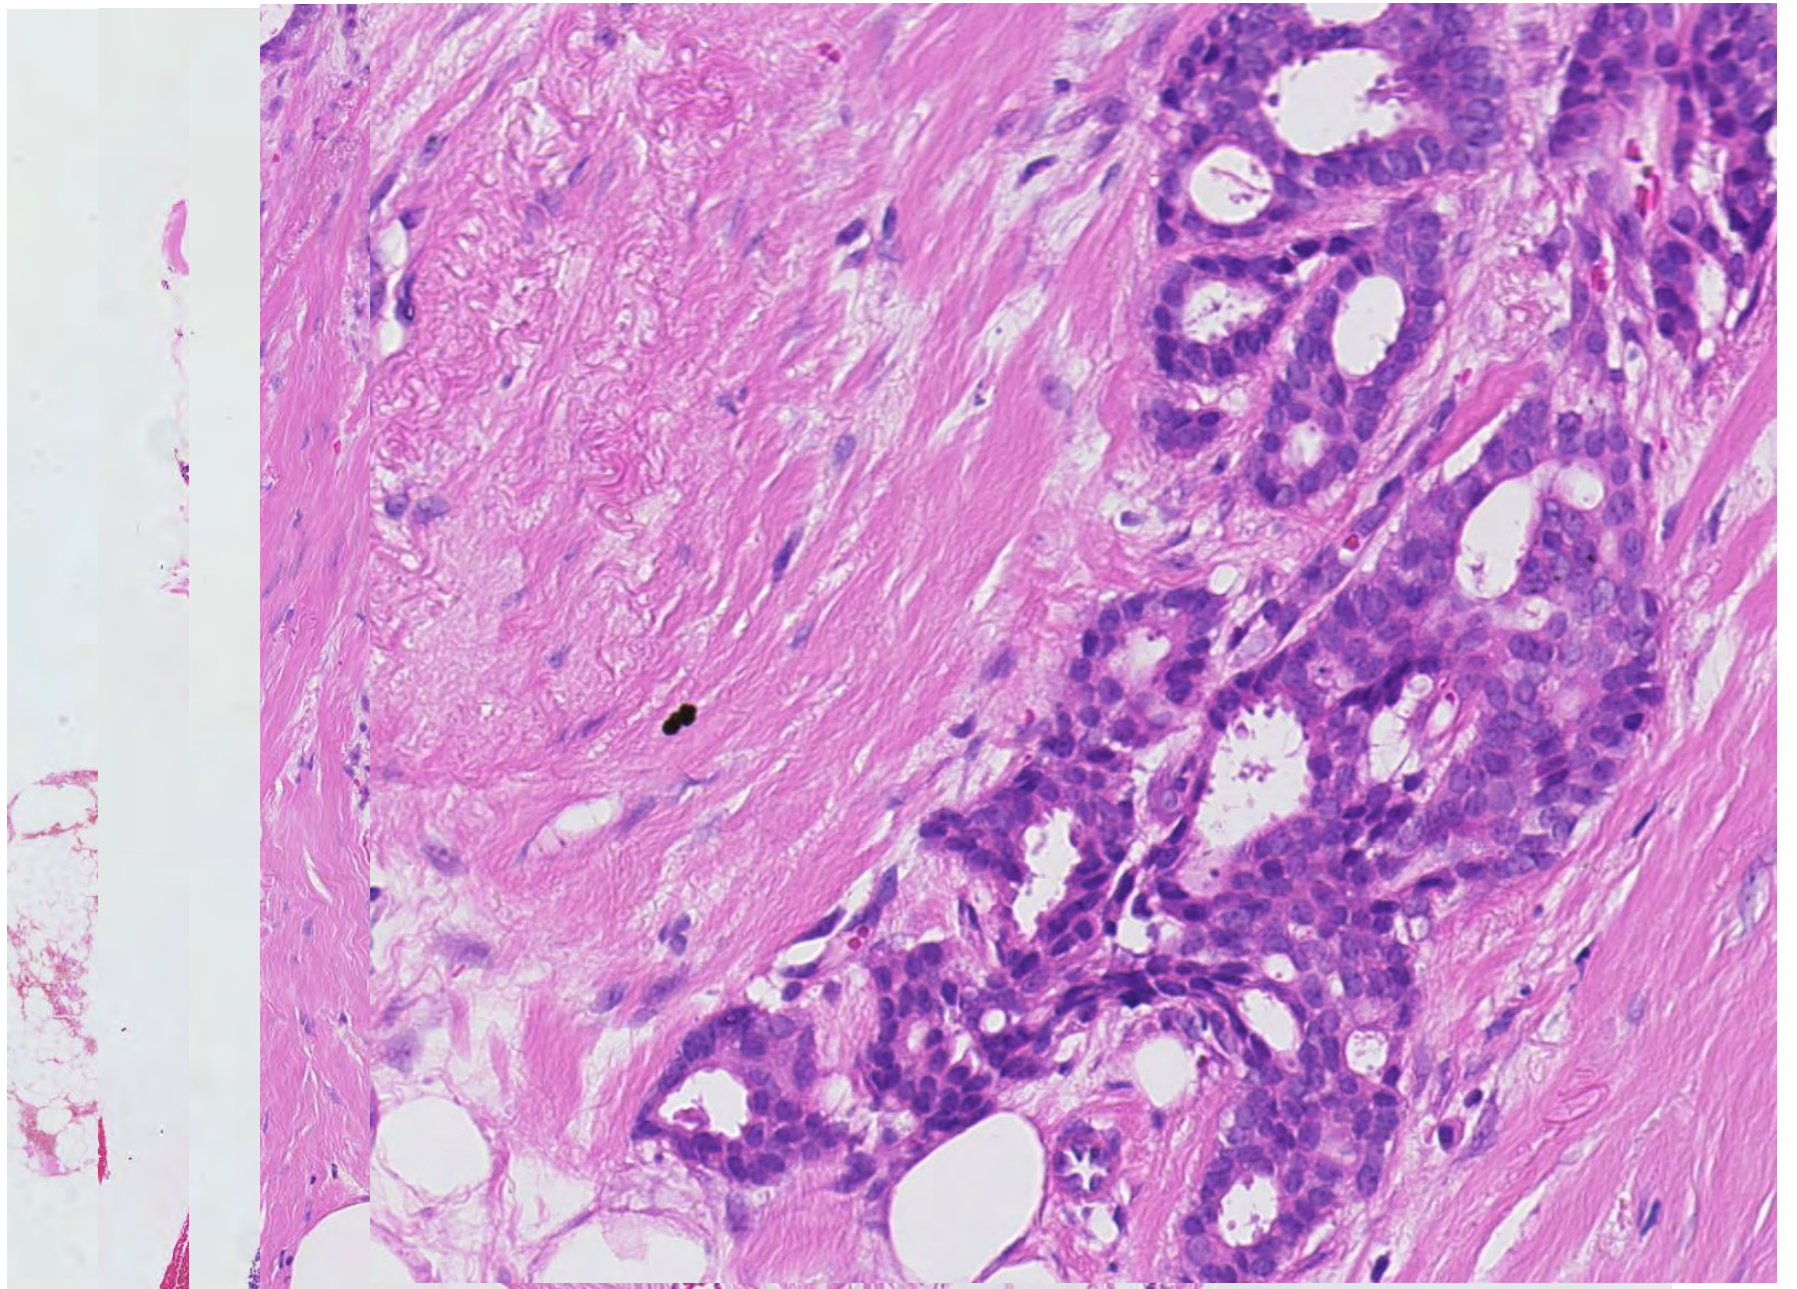

geen relevante voorgeschiedenis

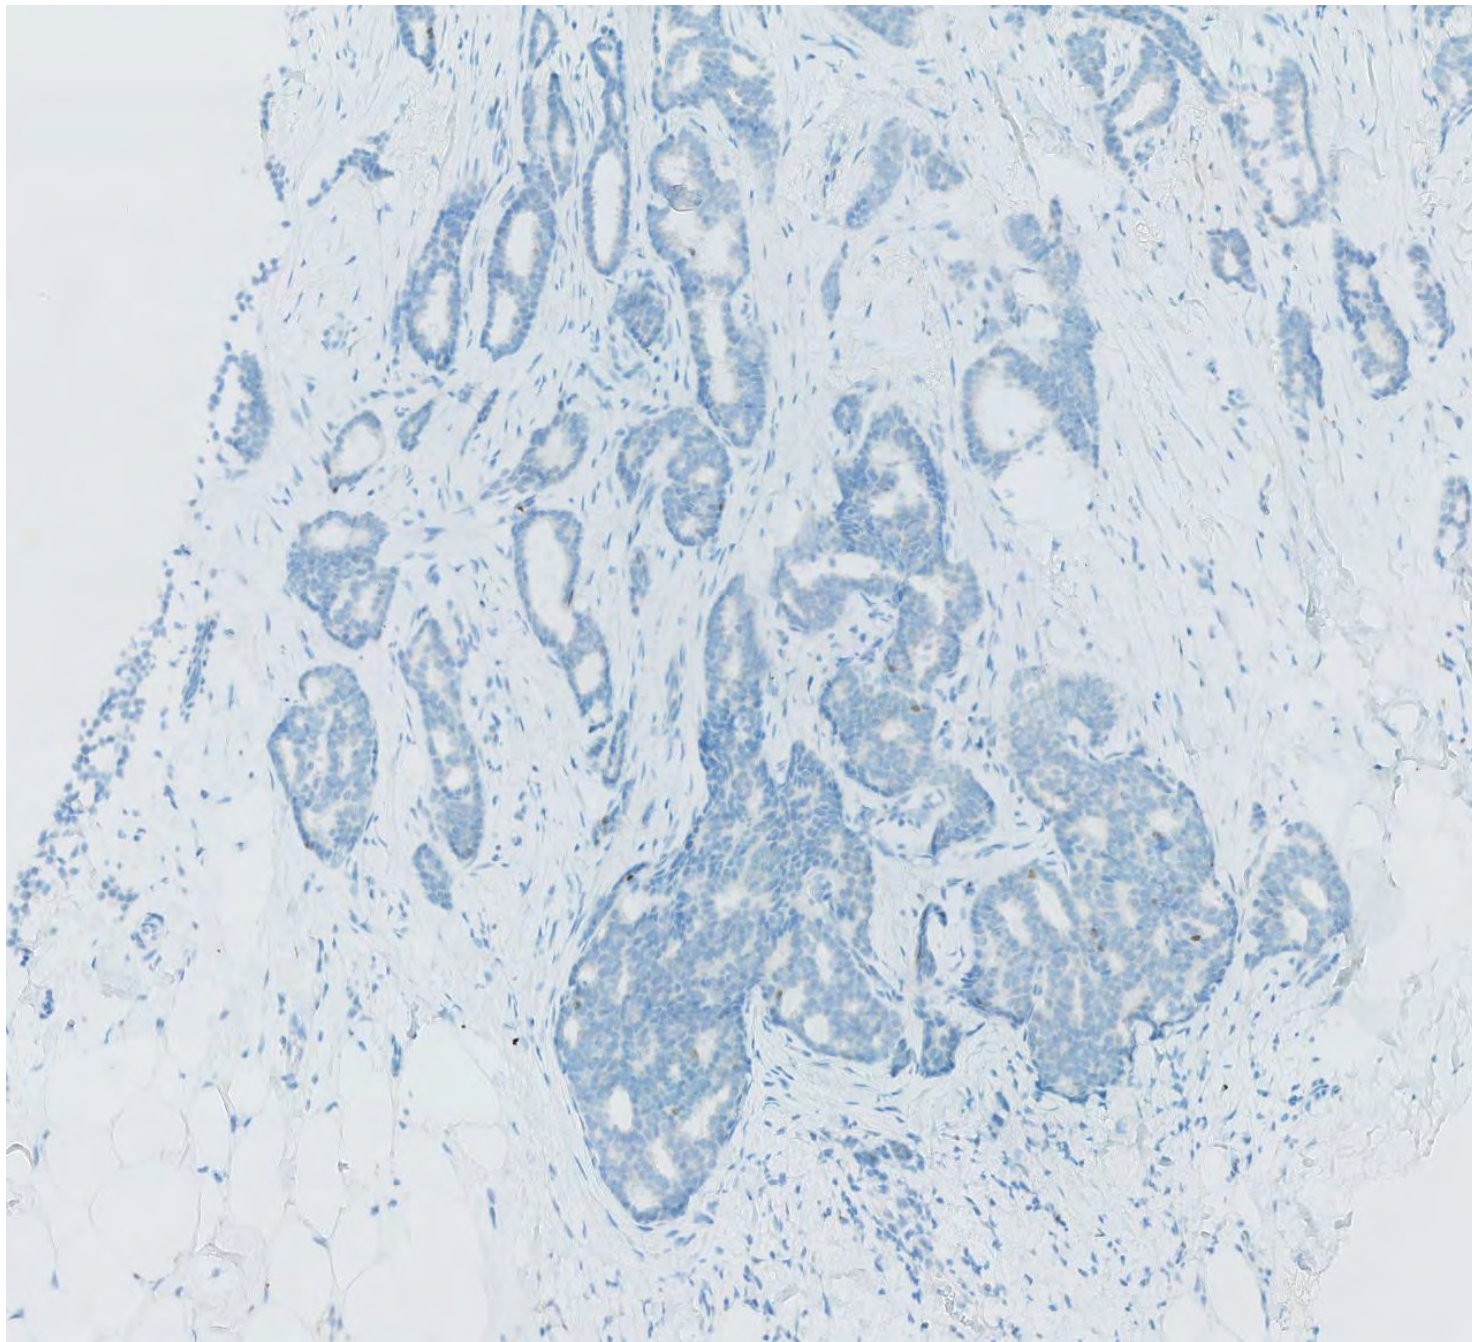

Aard materiaal

biopt mamma rechts

Kliniek

cT2(multicentrisch)N0, lobulair carcinoom
graad 2 links. Op MRI suspecte massa
rechts, echografisch niet reproduceerbaar.

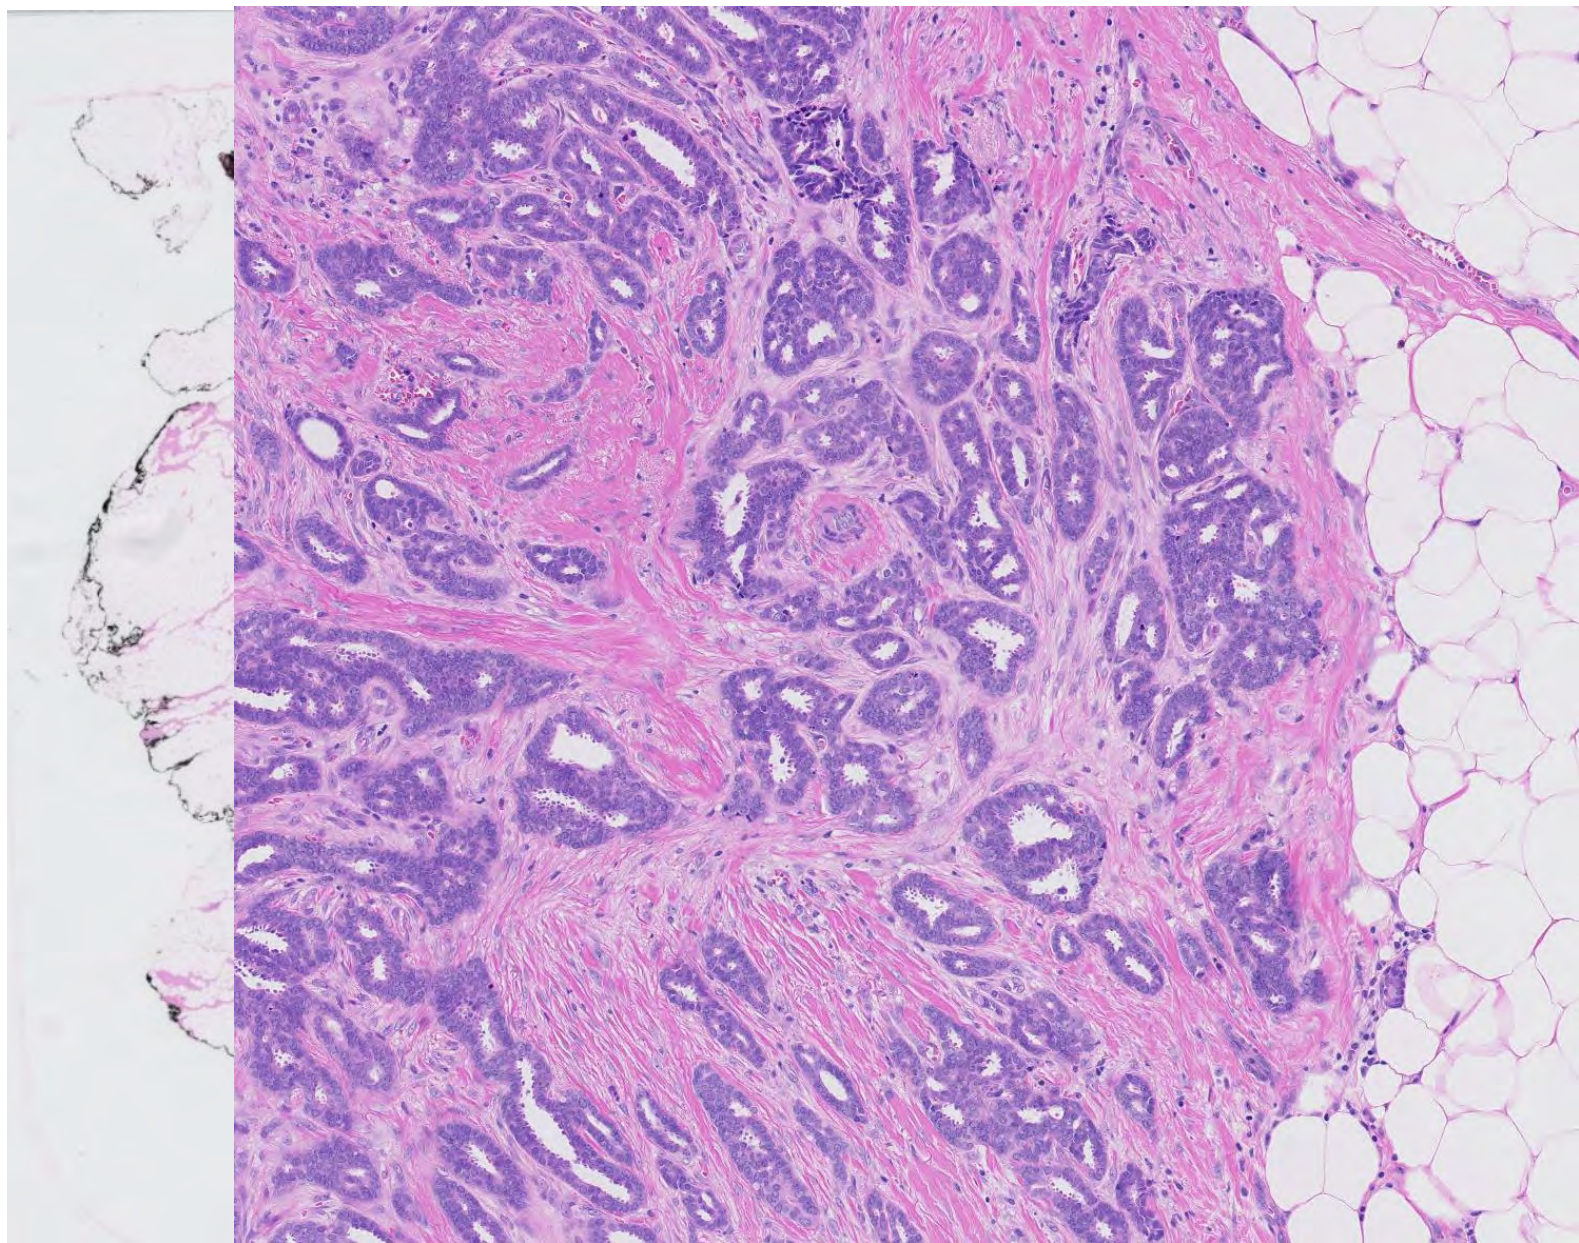

P63

CASUS 7B:

Tubulair carcinoom

CASUS
8A

Klinische gegevens

♀ 66

Voorgeschiedenis

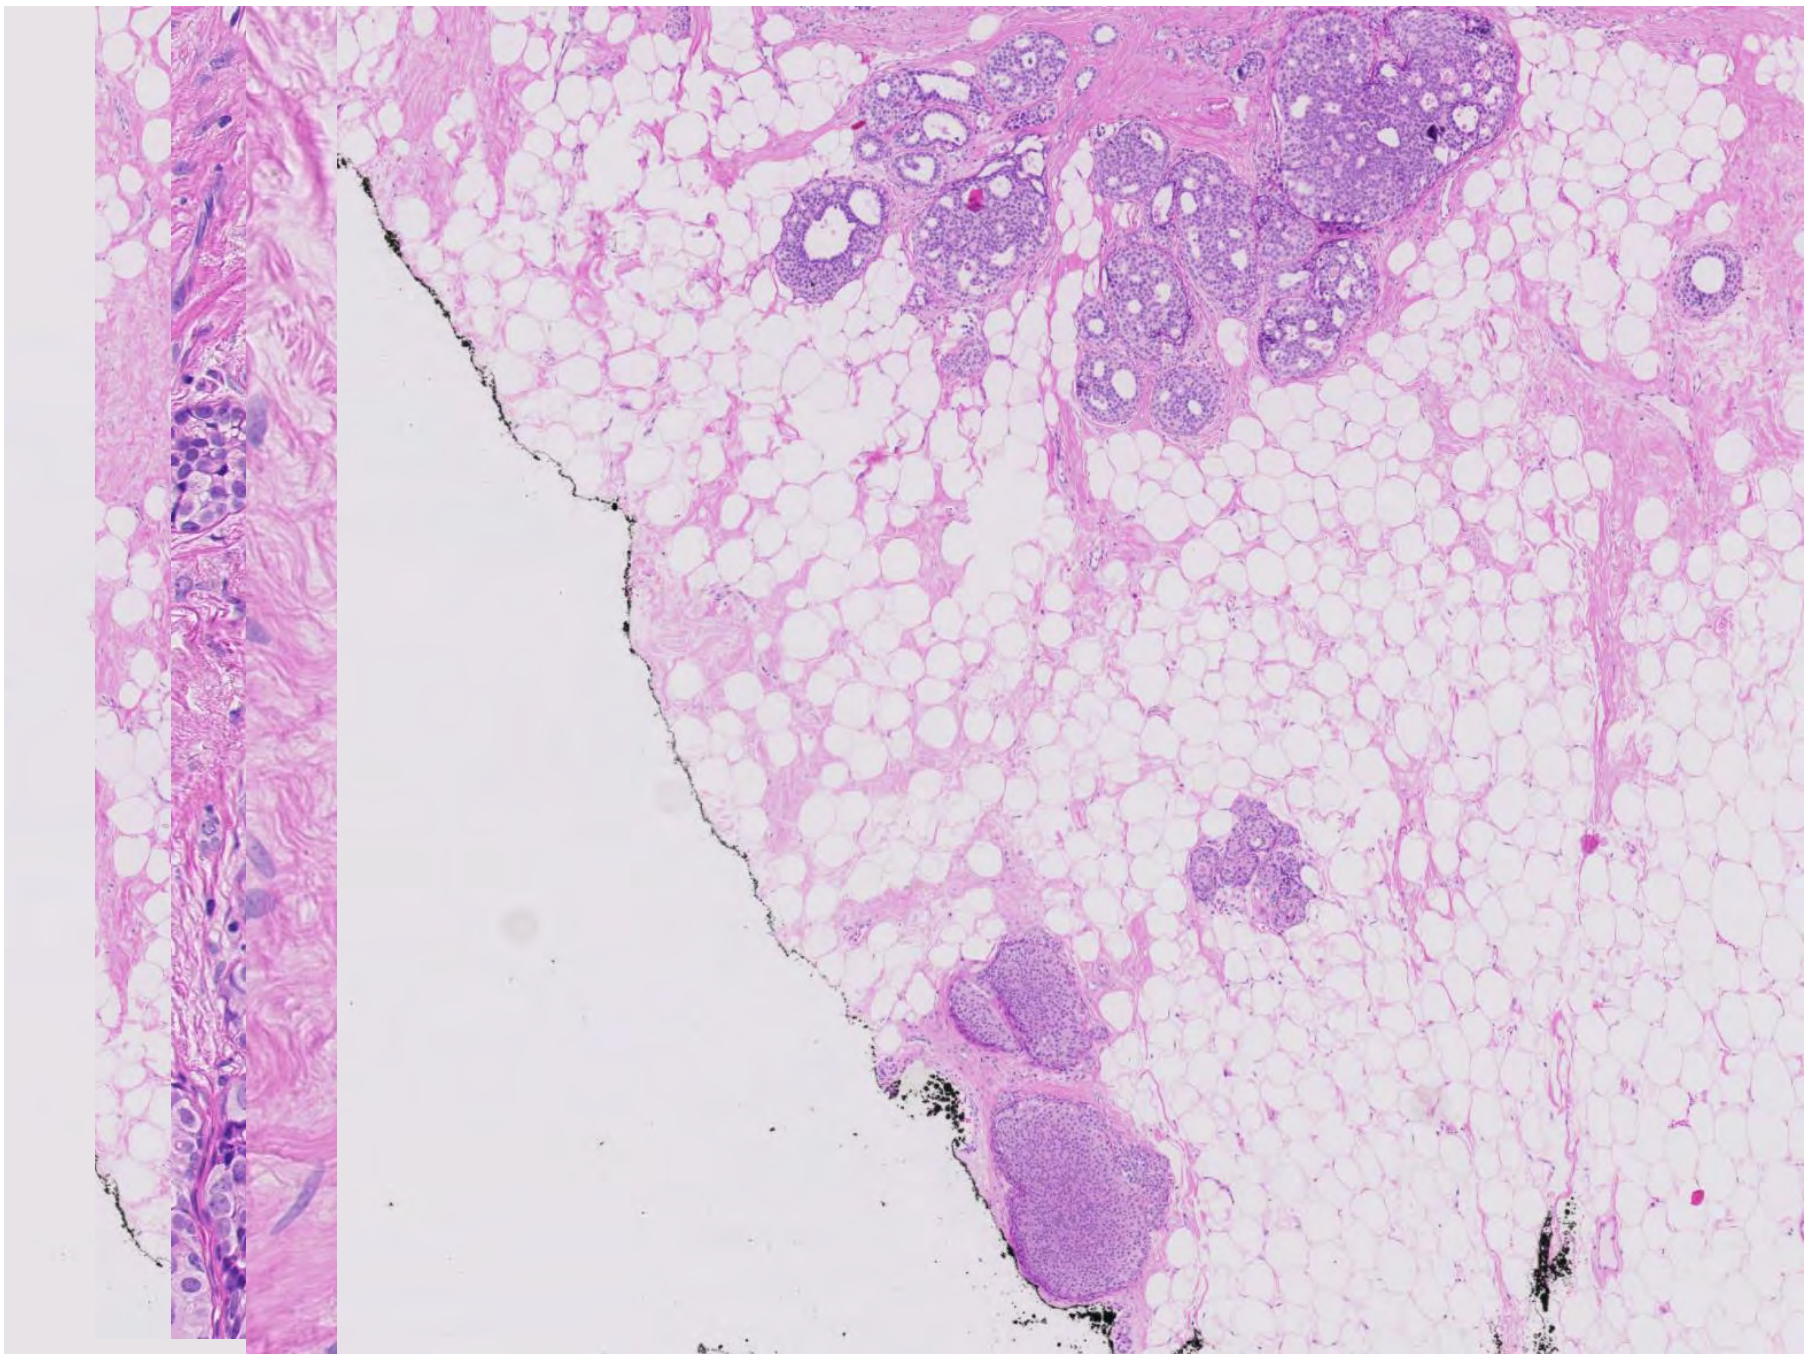

geen relevante voorgeschiedenis

Aard materiaal

biopt linker mamma

Kliniek

stervormige massa 6 mm, birads 5

CASUS 8A:
Complex scleroserende laesie
met DCIS

CASUS
8B

Klinische gegevens

♀ 50

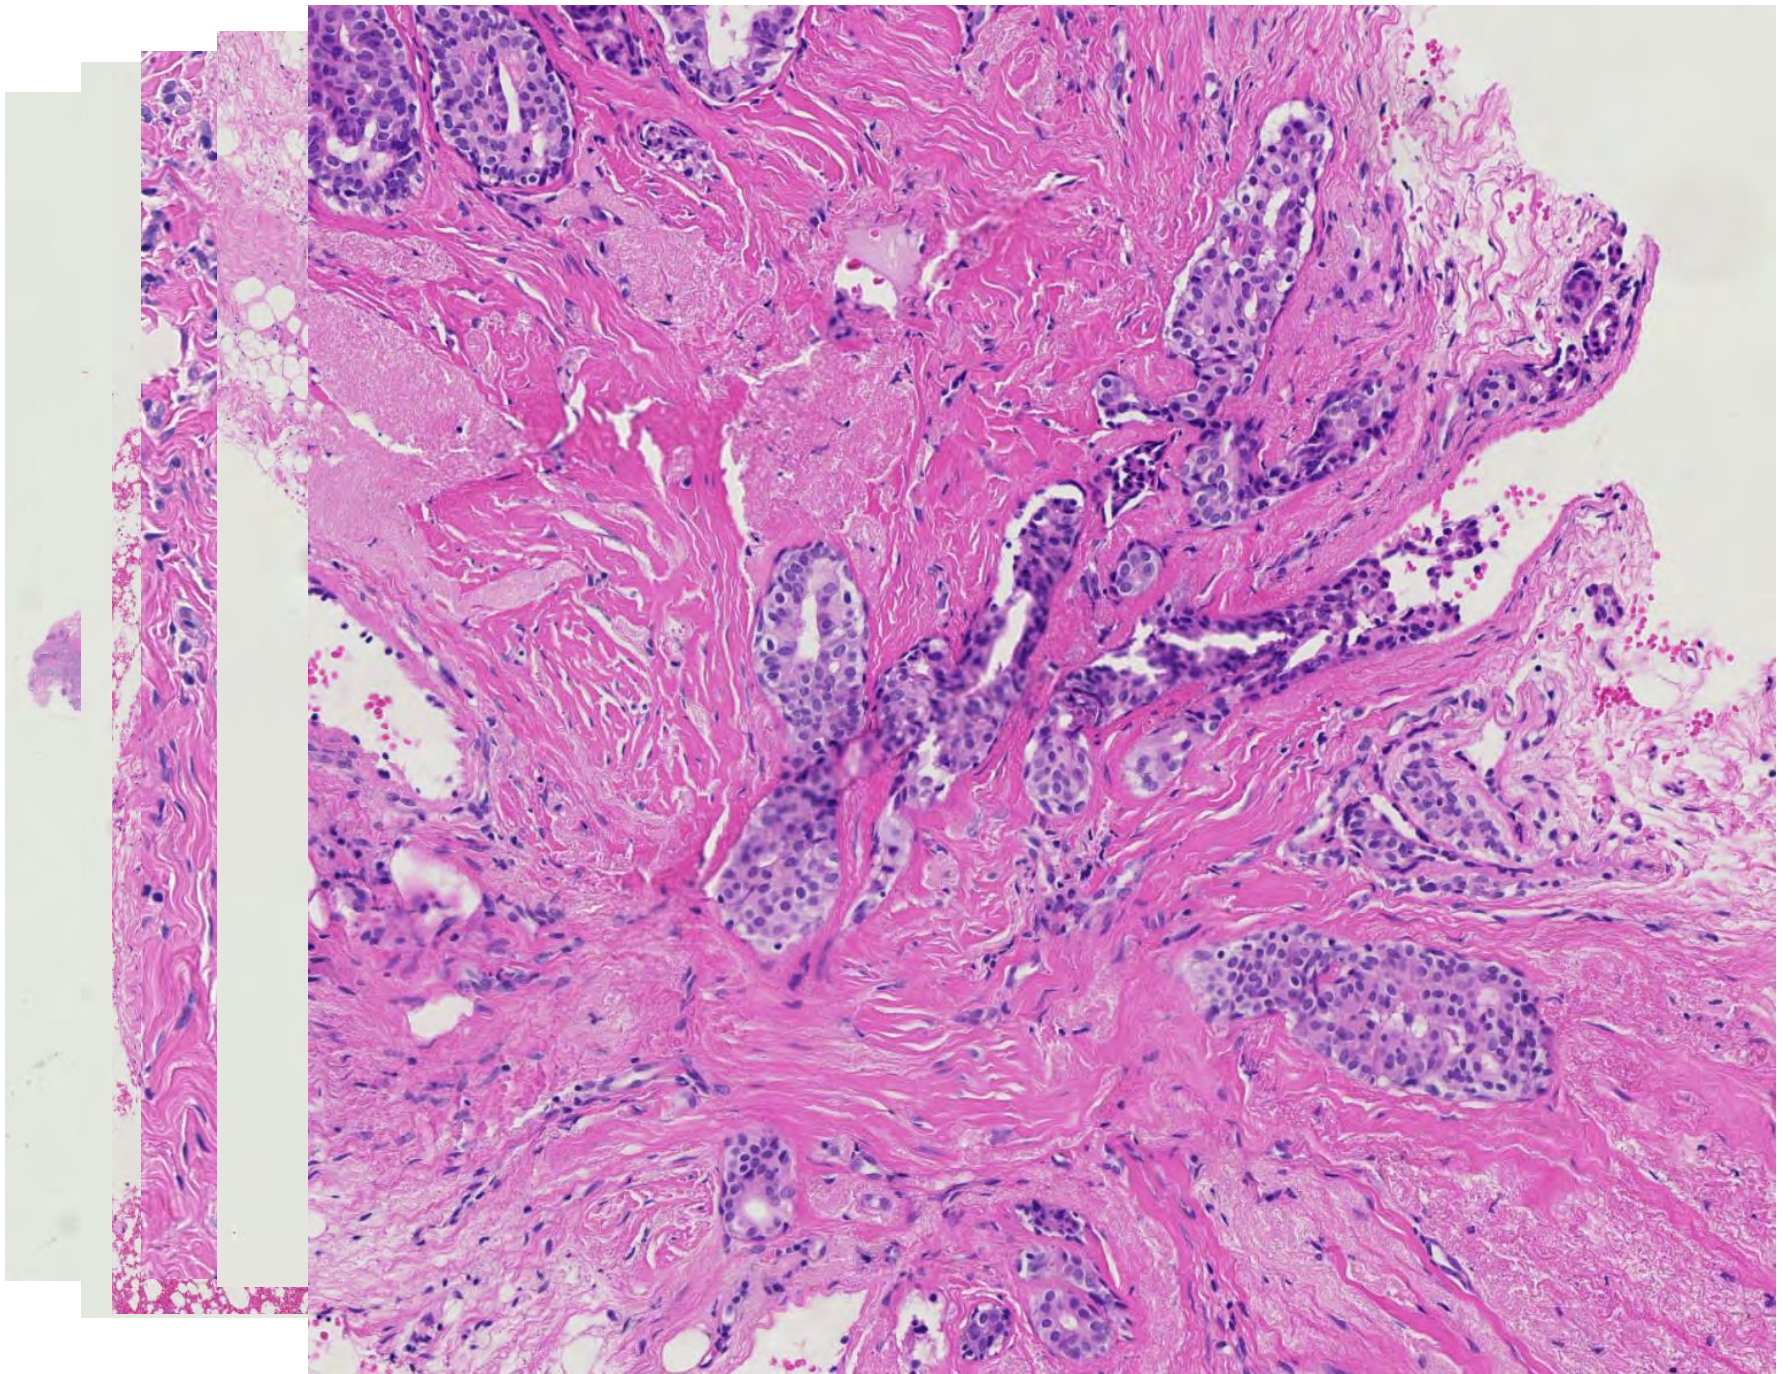

Voorgeschiedenis

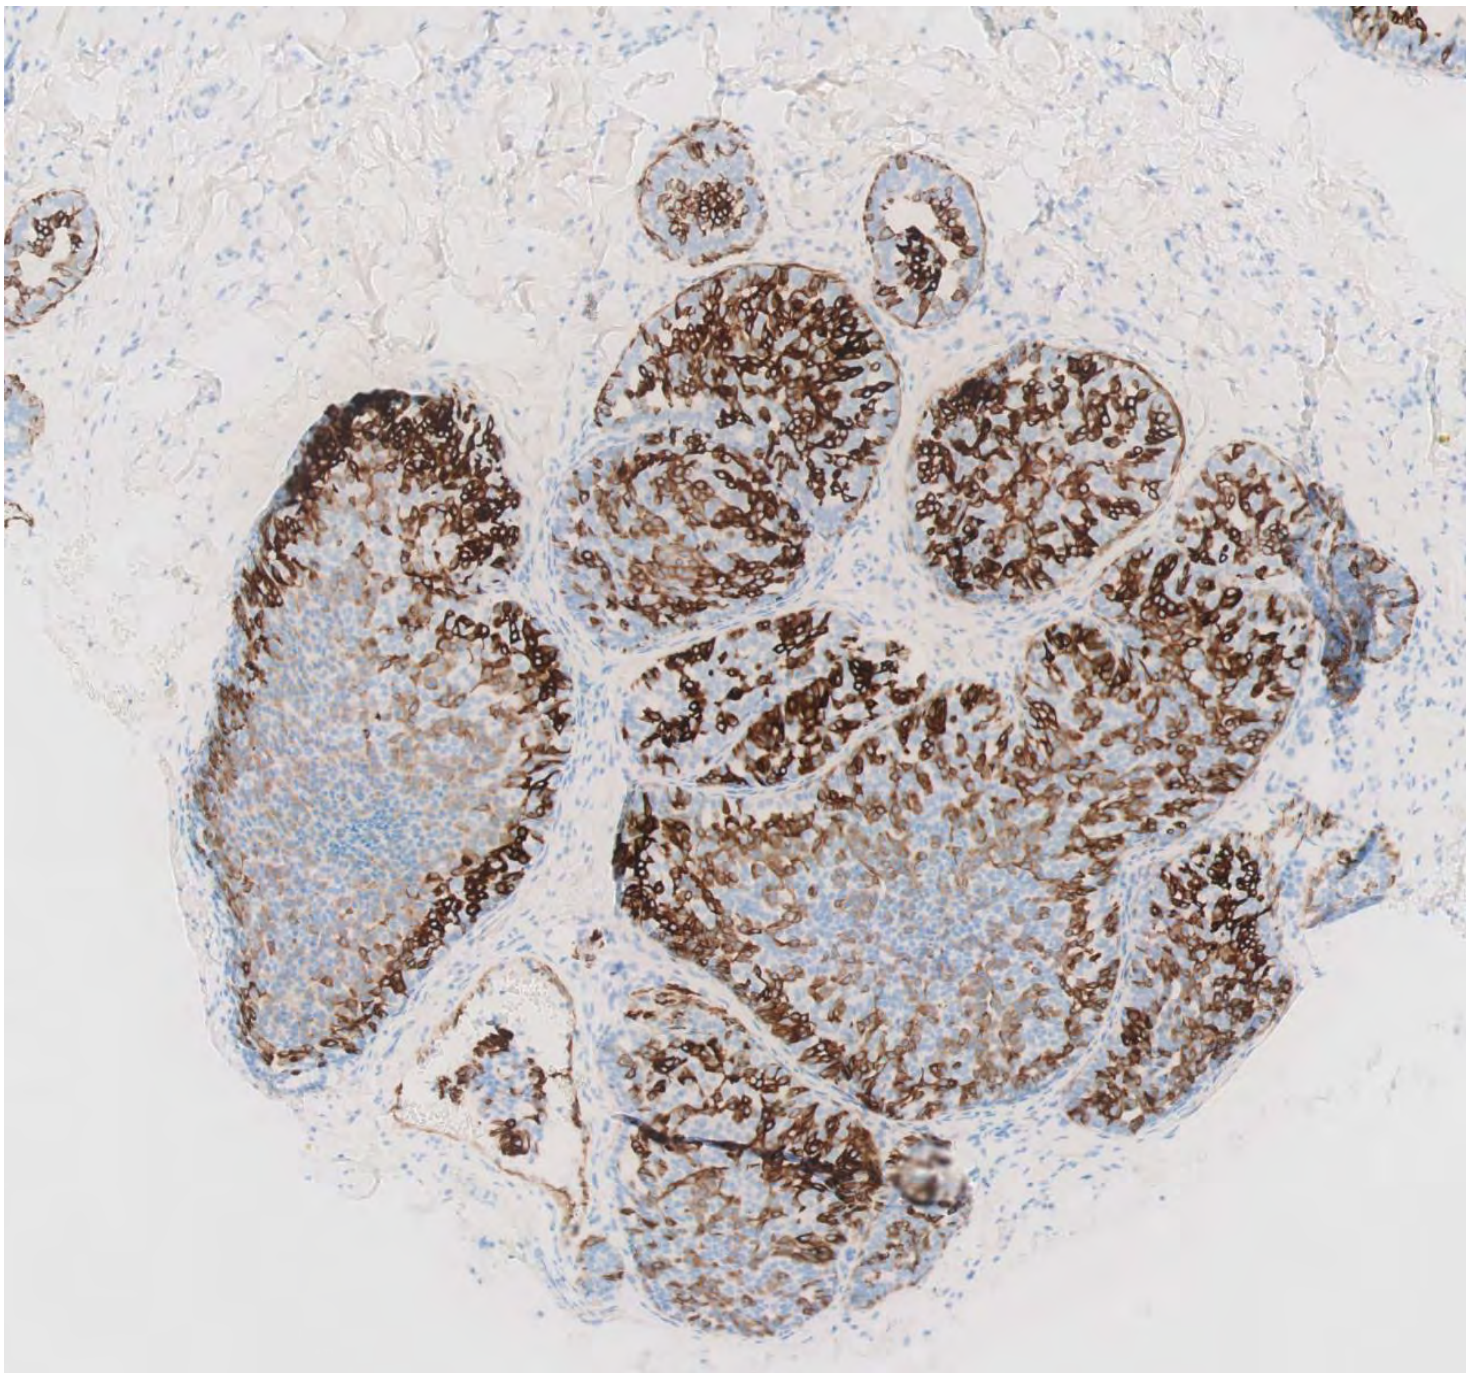

geen relevante voorgeschiedenis

Aard materiaal

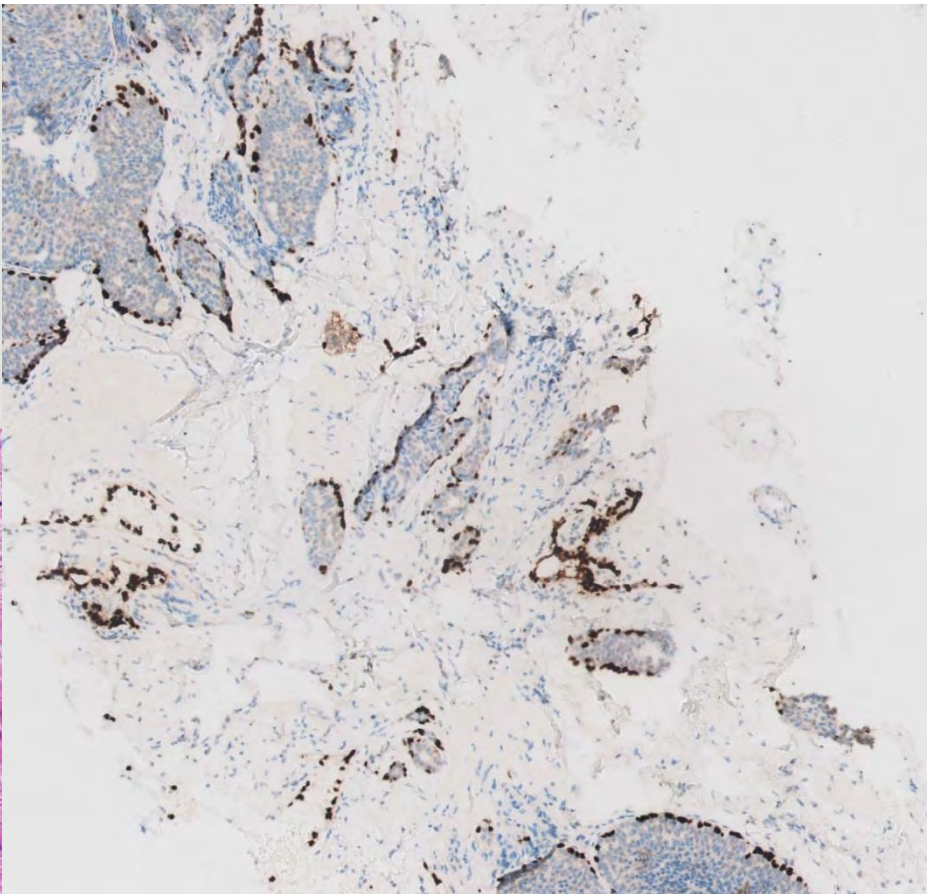

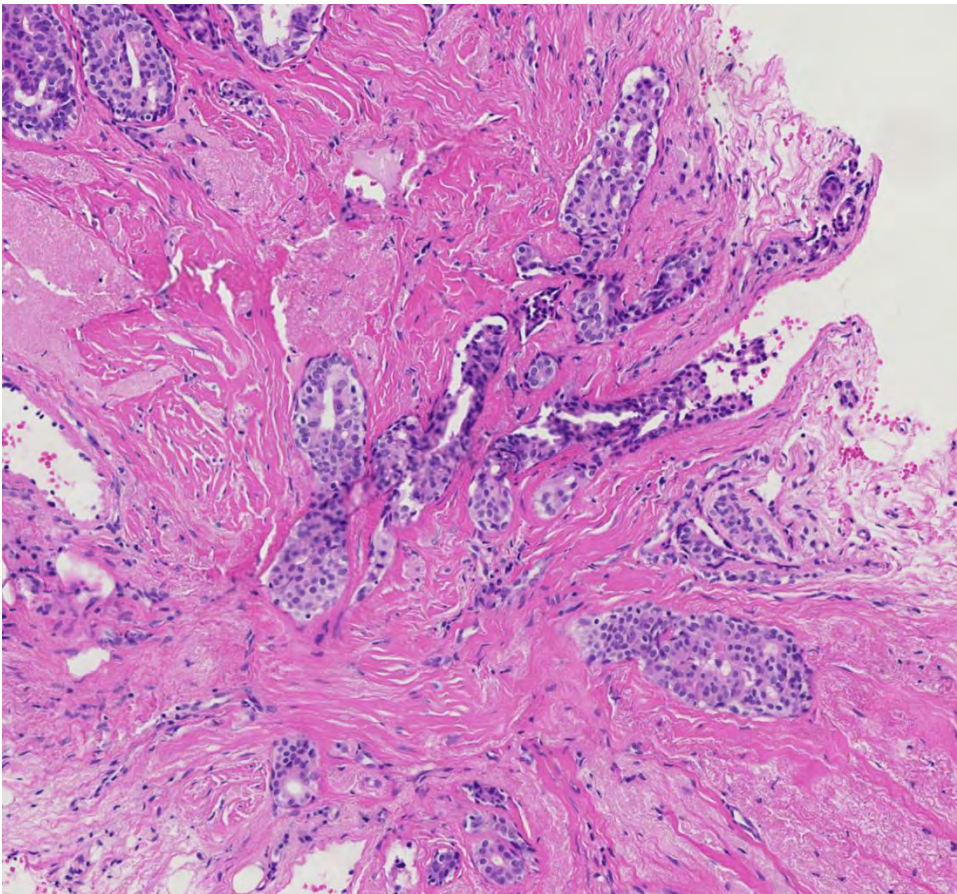

Vacuümbiopen mamma rechts.

Kliniek via BOB, microkalk rechts

CK5
